

**UNITED MICROELECTRONICS CORPORATION
PARENT COMPANY ONLY
FINANCIAL STATEMENTS
WITH REPORT OF INDEPENDENT ACCOUNTANTS
FOR THE YEARS ENDED
DECEMBER 31, 2013 AND 2012**

Address: No. 3 Li-Hsin Road II, Hsinchu Science Park, Hsinchu City, Taiwan, R.O.C.
Telephone: 886-3-578-2258

The reader is advised that these financial statements have been prepared originally in Chinese. In the event of a conflict between these financial statements and the original Chinese version or difference in interpretation between the two versions, the Chinese language financial statements shall prevail.

AUDIT REPORT OF INDEPENDENT ACCOUNTANTS

English Translation of a Report Originally Issued in Chinese

To United Microelectronics Corporation

We have audited the accompanying parent company only balance sheets of United Microelectronics Corporation (the "Company") as of December 31, 2013, December 31, 2012 and January 1, 2012, the related parent company only statements of comprehensive income, statements of changes in equity and cash flows for the years ended December 31, 2013 and 2012. These parent company only financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these parent company only financial statements based on our audits. Certain investments, which were accounted for under the equity method based on the financial statements of the investees, were audited by other independent accountants. Our audit, insofar as it related to the investments accounted for under the equity method balances of NT\$3,888 million, NT\$4,118 million and NT\$4,276 million, which represented 1.39%, 1.55% and 1.65% of the total assets as of December 31, 2013, December 31, 2012 and January 1, 2012, respectively, the related shares of investment income from the subsidiaries, associates and joint ventures amounted to NT\$191 million and NT\$64 million, which represented 1.31% and 0.78% of the income from continuing operations before income tax for the years ended December 31, 2013 and 2012, respectively, and the related shares of other comprehensive income (loss) from the subsidiaries, associates and joint ventures amounted to NT\$254 million and NT\$(168) million, which represented 1.98% and 45.23% of the total comprehensive income (loss), for the years ended December 31, 2013 and 2012, respectively, are based solely on the reports of other independent accountants.

We conducted our audits in accordance with auditing standards generally accepted in the Republic of China and "Regulations for Certified Public Accountants' Examination and Reports on Financial Statements", which require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management as well as evaluating the overall financial statement presentation. We believe that our audits and the reports of other independent auditors provide a reasonable basis for our opinion.

In our opinion, based on our audits and the reports of other independent accountants, the parent company only financial statements referred to above present fairly, in all material respects, the financial position of United Microelectronics Corporation as of December 31, 2013, December 31, 2012 and January 1, 2012, and the results of its operations and cash flows for the years ended December 31, 2013 and 2012, in conformity with the requirements of the Regulations Governing the Preparation of Financial Reports by Securities Issuers.

ERNST & YOUNG

Decrease in short-term loans	(1,490,750)	(5,929,450)
Proceeds from bonds issued	10,000,000	10,000,000
Bonds issuance costs	(12,010)	(12,830)
Redemption of bonds	(2,153,438)	(139,408)
Proceeds from long-term loans	1,200,000	6,500,000
Repayments of long-term loans	(3,026,603)	(1,691,025)
Increase in deposits-in	137,820	64,293
Decrease in deposits-in	(5,338)	(8,343)
Cash dividends	(5,061,303)	(6,316,420)
Exercise of employee stock options	442,423	266,116
Treasury stock acquired	(2,245,445)	-
Proceeds from disposal of treasury stock	967	4,207
Net cash provided by (used in) financing activities	(723,497)	6,542,800
Effect of exchange rate changes on cash and cash equivalents	499,527	(638,674)
Net increase in cash and cash equivalents	4,291,001	901,675
Cash and cash equivalents at beginning of period	31,723,084	30,821,409
Cash and cash equivalents at end of period	\$ 36,014,085	\$ 31,723,084
Investing activities partially paid by cash:		
Cash paid for acquiring property, plant and equipment		
Increase in property, plant and equipment	\$ 33,078,406	\$ 48,227,458
Add: Payable at beginning of period	4,127,187	6,718,165
Less: Payable at end of period	(5,895,452)	(4,127,187)
Cash paid	\$ 31,310,141	\$ 50,818,436

The accompanying notes are an integral part of the parent company only financial statements.

UNITED MICROELECTRONICS CORPORATION
NOTES TO PARENT COMPANY ONLY FINANCIAL STATEMENTS
For the Years Ended December 31, 2013 and 2012
(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

1. HISTORY AND ORGANIZATION

United Microelectronics Corporation (the Company) was incorporated in Republic of China (R.O.C.) in May 1980 and commenced operations in April 1982. The Company is a full service semiconductor wafer foundry, and provides a variety of services to satisfy customer needs. The Company's ordinary shares were publicly listed on the Taiwan Stock Exchange (TSE) in July 1985 and its American Depositary Shares (ADSs) were listed on the New York Stock Exchange (NYSE) in September 2000.

2. DATE AND PROCEDURES OF AUTHORIZATION OF FINANCIAL STATEMENTS FOR ISSUE

The parent company only financial statements of the Company for the years ended December 31, 2013 and 2012 were authorized for issue in accordance with a resolution of the Board of Directors' meeting on March 12, 2014.

3. NEWLY ISSUED OR REVISED STANDARDS AND INTERPRETATIONS

- (1) Standards or interpretations issued, revised or amended, which are recognized by the Financial Supervisory Commission (FSC), but not yet adopted by the Company at the date of issuance of the Company's financial statements, are listed below:

International Financial Reporting Standard 9, "Financial Instruments(IFRS 9)":

IFRS 9 which is divided in three distinct phases is designed by the International Accounting Standards Board (IASB) to eventually replace International Accounting Standard 39 "Financial Instruments: Recognition and Measurement" (IAS 39) in its entirety. The first phase relates to the classification and measurement of financial assets and liabilities. The IASB is working on the remaining phase relating to impairment. However companies adopting IFRSs, IASs, and Interpretations developed by the International Financial Reporting Interpretations Committee (IFRIC) or the former Standing Interpretations Committee (SIC) as recognized by the FSC (collectively referred to as "TIFRS") may not early adopt IFRS 9. Adopting the first phase of IFRS 9 will have an impact on the Company's classification and measurement of its financial assets, but will not have an impact on the classification and measurement of its financial liabilities. The impact of adopting the remaining two phases of IFRS 9 on the Company can not be determined at this stage.

(2) Standards issued by IASB but not yet recognized by FSC:

No.	The projects of Standards or Interpretations	Effective for annual periods beginning on or after
IFRS 1	First-time Adoption of International Financial Reporting Standards - Limited Exemption from Comparative IFRS 7 Disclosures for First-time Adopters Improvements to International Financial Reporting Standards (issued in 2010)	July 1, 2010

IFRS 13	Fair Value Measurement	July 1, 2014
IAS 40	Investment Property	July 1, 2014
IFRS 14	Regulatory Deferral Accounts	January 1, 2016

The potential effects of adopting the standards or interpretations issued by IASB but not yet recognized by FSC on the Company's financial statements in future periods are summarized as below:

(1) IFRS 3 “Business Combinations”

Under the amendment, IFRS 3 (as revised in 2008) do not apply to contingent consideration that arose from business combinations whose acquisition dates precede the application of IFRS 3 (as revised in 2008). Furthermore, the amendment limits the scope of the measurement choices for non-controlling interest. Only the components of non-controlling interests that are present ownership interests that entitle their holders to a proportionate share of the entity's net assets, in the event of liquidation could be measured at either fair value or at the present ownership instruments' proportionate share of the acquiree's identifiable net assets. Other components of non-controlling interest are measured at their acquisition date fair value.

The amendment also requires an entity in a business combination to account for the replacement of the acquiree's share-based payment transactions (when the acquirer is not obliged to do so) as new share-based payment awards in the post-combination financial statements.

Outstanding share-based payment transactions that the acquirer does not exchange for its share-based payment transactions: if vested — they are part of non-controlling interest; if unvested — they are measured at market based value as if granted at acquisition date, and allocated between NCI and post-combination expense.

These amendments became effective for annual periods beginning on or after 1 July, 2010.

(2) IAS 34 “Interim Financial Reporting”

The amendment clarifies that if a user of an entity's interim financial report have access to the most recent annual financial report of that entity, it is unnecessary for the notes to an interim financial report to provide relatively insignificant updates to the information that was reported in the notes in the most recent annual financial report. Furthermore the amendment requires additional disclosures of financial instruments and contingent liabilities/assets. The amendment became effective for annual periods beginning on or after January 1, 2011.

(3) IFRS 7 “Financial Instruments: Disclosures”

The amendment emphasizes the interaction between quantitative and qualitative disclosures and the nature and extent of risks associated with financial instruments so that users of financial statements will have a better understanding. The amendment became effective for annual periods beginning on or after January 1, 2011.

(4) IFRS 7 “Financial Instruments: Disclosures” (Amendment)

The amendment requires additional quantitative and qualitative disclosures relating to transfers of financial assets, when financial assets are derecognized in their entirety, but the entity has a continuing involvement in them, or when financial assets are not derecognized in their entirety. The amendment became effective for annual periods beginning on or after July 1, 2011.

(5) IFRS 10 “Consolidated Financial Statements”

IFRS 10 “Consolidated Financial Statements”(IFRS 10) replaces the portion of IAS 27 “Consolidated and Separate Financial Statements” (IAS 27) that addresses the accounting for consolidated financial statements and SIC-12 “Consolidation-Special Purpose Entities”. The changes introduced by IFRS 10 primarily relate to the elimination of the perceived inconsistency between IAS 27 and SIC-12 by introducing a new integrated control model. That is, IFRS 10 primarily relates to whether to consolidate another entity, but does not change how an entity is consolidated. The standard became effective for annual periods beginning on or after January 1, 2013.

(6) IFRS 11 “Joint Arrangements”

IFRS 11 “Joint Arrangements” replaces IAS 31 “Interests in Joint Ventures” and SIC-13 “Jointly Controlled Entities-Non-Monetary Contributions by Venturers”. The changes introduced by IFRS 11 primarily relate to increase comparability within IFRSs by removing the choice for accounting for jointly controlled entities under the proportionate consolidation method, so that the structure of the arrangement is no longer the most important factor when determining the classification as a joint operation or a joint venture (an investment classified as a joint venture is accounted for in accordance with IAS 28 “Investments in Associates and Joint Ventures”), which then determines the accounting. The standard became effective for annual periods beginning on or after January 1, 2013.

(7) IFRS 12 “Disclosures of Interests in Other Entities”

IFRS 12 “Disclosures of Interests in Other Entities” primarily integrates and makes consistent the disclosure requirements for subsidiaries, joint arrangements, associates and unconsolidated structured entities and present those requirements in a single IFRS. The standard became effective for annual periods beginning on or after January 1, 2013.

(8) IFRS 13 “Fair Value Measurement”

IFRS 13 “Fair Value Measurement” (IFRS 13) primarily relates to defining fair value, setting out in a single IFRS framework for measuring and disclosing fair values to reduce complexity and improve consistency in applying fair value measurement. However, IFRS 13 does not change existing requirements in other IFRSs as to when the fair value measurement or related disclosure is required. The standard became effective for annual periods beginning on or after January 1, 2013.

(9) IAS 19 “Employee Benefits” (Revised)

The revision includes: (1) For defined benefit plans, the ability to defer the recognition of actuarial gains and losses (i.e., the corridor approach) has been removed. Actuarial gains and losses will be recognized in other comprehensive income as they occur. (2) Amounts recorded in profit or loss are limited to current and past service costs, gains or losses on settlements, and net interest income (expense) on the pension asset or liability. (3) New disclosures include quantitative information about the sensitivity of the defined benefit obligation to reasonably possible changes in each significant actuarial assumption. (4) Termination benefits will be recognized at the earlier of when the offer of termination cannot be withdrawn, or when the related restructuring costs are recognized under IAS 37 “Provisions, Contingent Liabilities and Contingent Assets”. The revised standard became effective for annual periods beginning on or after January 1, 2013.

(10) IAS 1 “Presentation of Financial Statements”

The amendment clarifies that an entity will present an analysis of other comprehensive income for each component of equity, either in the statement of changes in equity or in the notes to the financial statements. The amendment became effective for annual periods beginning on or after January 1, 2011.

(11) Presentation of Items of Other Comprehensive Income (Amend IAS 1 “Presentation of Financial Statements”)

The amendments to IAS 1 change the grouping of items presented in other comprehensive income. Items that would be reclassified (or recycled) to profit or loss at certain points in the future would be presented separately from items that will never be reclassified. The amendment became effective for annual periods beginning on or after July 1, 2012.

(12) IAS 34 “Interim Financial Reporting”

The amendment clarifies the requirements in IAS 34 relating to segment information for total assets and liabilities for each reportable segment to enhance consistency with the requirements in IFRS 8 “Operating Segments”. Besides, total assets and liabilities for a particular reportable segment need to be disclosed only when the amounts are regularly provided to the chief operating decision maker and there has been a material change in the total amount disclosed in the entity’s previous annual financial statements for that reportable segment. The amendment became effective for annual periods beginning on or after January 1, 2013.

(13) IFRS 10 “Consolidated Financial Statements” (Amendment)

The amendments related to Investment Entities provide an exception to the consolidation requirements in IFRS 10 and require investment entities to account for particular subsidiaries at fair value through profit or loss, rather than consolidating them. The amendments also set out disclosure requirements for investment entities. The amendment is effective for annual periods beginning on or after January 1, 2014.

(14) IAS 36 “Impairment of Assets” (Amendment)

This amendment relates to the amendment issued in May 2011 and requires entities to disclose the recoverable amount of an asset (including goodwill) or a cash-generating unit when an impairment loss has been recognized or reversed during the period. The amendment also requires detailed disclosure of how the fair value less costs of disposal has been determined when an impairment loss has been recognized or reversed, including valuation techniques used, level of fair value hierarchy of assets and key assumptions used in the measurements. The amendment is effective for annual periods beginning on or after January 1, 2014.

(15) IFRIC 21 “Levies”

This interpretation provides guidance on when to recognize a liability for a levy imposed by a government (both for levies that are accounted for in accordance with IAS 37 “Provisions, Contingent Liabilities and Contingent Assets” and those where the timing and amount of the levy is certain). The interpretation is effective for annual periods beginning on or after January 1, 2014.

(16) IAS 39 “Financial Instruments: Recognition and Measurement” (Amendment) -
Novation of Derivatives and Continuation of Hedge Accounting

Under the amendment, there would be no need to discontinue hedge accounting if a hedging derivative was novated, provided certain criteria are met. The interpretation is effective for annual periods beginning on or after January 1, 2014.

(17) IFRS 9 “Financial Instruments”-Hedge accounting

The IASB announced amendments to the accounting requirements for financial instruments, which include: (1) a substantial overhaul of IAS 39 hedge accounting that will allow entities to better reflect their risk management activities in the financial statements; (2) changes to address that the “own credit” not recognized in profit or loss. This amendment may be applied in isolation without the need to change any other accounting for financial instruments; and (3) remove the 1 January 2015 mandatory effective date of IFRS 9.

(18) IFRS 8 “Operating Segments”

The amendments require an entity to disclose the judgements made by management in applying the aggregation criteria to operating segments. The amendments also clarify that an entity shall only provide reconciliations of the total of the reportable segments’ assets to the entity’s assets if the segment assets are reported regularly to the Chief Operating Decision Maker (CODM). The amendment is effective for annual periods beginning on or after 1 July 2014.

(19) IFRS 13 “Fair Value Measurement”

The amendment to the Basis for Conclusions of IFRS 13 clarifies that when deleting paragraph B5.4.12 of IFRS 9 Financial Instruments and paragraph AG79 of IAS 39 Financial Instruments: Recognition and Measurement as consequential amendments from IFRS 13 Fair Value Measurement, the IASB did not intend to change the measurement requirements for short-term receivables and payables.

(20) IAS 24 “Related Party Disclosures”

The amendment clarifies that an entity providing key management personnel services to the reporting entity or to the parent of the reporting entity is a related party of the reporting entity. The amendment is effective for annual periods beginning on or after 1 July 2014.

(21) IFRS 1 “First-time Adoption of International Financial Reporting Standards”

The amendment clarifies that an entity, in its first IFRS financial statements, has the choice between applying an existing and currently effective IFRS or applying early a new or revised IFRS that is not yet mandatorily effective, provided that the new or revised IFRS permits early application.

(22) IFRS 13 “Fair Value Measurement”

The amendment clarifies that paragraph 52 of IFRS 13 includes a scope exception for measuring the fair value of a group of financial assets and financial liabilities on a net basis. The objective of this amendment is to clarify that this portfolio exception applies to all contracts within the scope of IAS 39 Financial Instruments: Recognition and Measurement or IFRS 9 Financial Instruments, regardless of whether they meet the definitions of financial assets or financial liabilities as defined in IAS 32 Financial Instruments: Presentation. The amendment is effective for annual periods beginning on or after 1 July 2014.

The abovementioned standards and interpretations issued by IASB have not yet been recognized by FSC at the date of issuance of the Company’s financial statements, and the local effective dates are to be determined by FSC. As the Company is still currently determining the potential impact of the standards and interpretations listed under (1)~(22), it is not practicable to estimate their impact on the Company’s consolidated financial statements at this point in time. All other standards and interpretations have no material impact on the Company.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

(1) Statement of Compliance

The Company's parent company only financial statements as of and for the years ended December 31, 2013 and 2012 were prepared in accordance with Regulations Governing the Preparation of Financial Reports by Securities Issuers (Regulations).

(2) Basis of Preparation

The parent company only financial statements have been prepared on a historical cost basis, except for financial instruments measured at fair value.

The Company prepared parent company only financial statements in accordance with Article 21 of the Regulations, which provided that the profit or loss and other comprehensive income for the period presented in the parent company only financial statements shall be the same as the profit or loss and other comprehensive income attributable to stockholders of the parent presented in the consolidated financial statements for the period, and the total equity presented in the parent company only financial statements shall be the same as the equity attributable to the parent company presented in the consolidated financial statements. Therefore, the Company accounted for its investments in subsidiaries using equity method and, accordingly, made necessary adjustments.

(3) Foreign Currency Transactions

The Company's parent company only financial statements are presented in its functional currency, New Taiwan Dollars (NTD). Items included in the financial statements are measured using that functional currency.

Transactions in foreign currencies are initially recorded by the Company at functional currency rates prevailing at the transaction date. Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency closing rates of exchange at the reporting date. Non-monetary items measured at fair value in foreign currencies are translated using the exchange rates at the date when the fair value is determined. Non-monetary items that are measured at historical cost in foreign currencies are translated using the exchange rates as at the dates of the initial transactions.

All exchange differences arising on the settlement of monetary items or on translating monetary items are taken to profit or loss in the period in which they arise except for the following:

- a. Exchange differences arising from foreign currency borrowings for an acquisition of a qualifying asset to the extent that they are regarded as an adjustment to interest costs are included in the borrowing costs that are eligible for capitalization.
- b. Foreign currency derivatives within the scope of IAS 39 are accounted for based on the accounting policy for financial instruments.
- c. Exchange differences arising on a monetary item that is part of a reporting entity's net investment in a foreign operation are recognized initially in other comprehensive income and reclassified from equity to profit or loss upon disposal of such investment.

When a gain or loss on a non-monetary item is recognized in other comprehensive income, any exchange component of that gain or loss is recognized in other comprehensive income. When a gain or loss on a non-monetary item is recognized in profit or loss, any exchange component of that gain or loss is recognized in profit or loss.

(4) Translation of Foreign Currency Financial Statements

The assets and liabilities of foreign operations are translated into NTD at the closing rate of exchange prevailing at the reporting date and the income and expenses are translated at an average exchange rate for the period. The exchange differences arising on the translation are recognized in other comprehensive income. On disposal of a foreign operation, the cumulative amount of the exchange differences relating to that foreign operation, recognized in other comprehensive income and accumulated in the separate component of equity, is reclassified from equity to profit or loss when the gain or loss on disposal is recognized.

On partial disposal of a foreign operation that does not result in a loss of control, the proportionate share of the cumulative amount of the exchange differences recognized in other comprehensive income is re-attributed to the non-controlling interests in that foreign operation. In partial disposal of an associate or jointly controlled entity that includes a foreign operation that does not result in a loss of significant influence or joint control, only the proportionate share of the cumulative amount of the exchange differences recognized in other comprehensive income is reclassified to profit or loss.

Any goodwill and any fair value adjustments to the carrying amounts of assets and liabilities arising from the acquisition of a foreign operation are treated as assets and liabilities of the foreign operation and expressed in its functional currency.

(5) Current and Non-current Distinction

An asset is classified as current when:

- a. the Company expects to realize the asset, or intends to sell or consume it, in its normal operating cycle;
- b. the Company holds the asset primarily for the purpose of trading;
- c. the Company expects to realize the asset within twelve months after the reporting period; or
- d. the asset is cash or a cash equivalent unless the asset is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is classified as a current when:

- a. the Company expects to settle the liability in normal operating cycle;
- b. the Company holds the liability primarily for the purpose of trading;
- c. the liability is due to be settled within twelve months after the reporting period; or
- d. the Company does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting date. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

All other liabilities are classified as non-current.

(6) Cash Equivalents

Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash and with maturity dates that do not present significant risks on changes in value resulting from changes in interest rates, including time deposits with original maturities of three months or less and repurchase agreements collateralized by government bonds and corporate bonds.

(7) Financial Instruments

Financial assets and financial liabilities are recognized when the Company becomes a party to the contractual provisions of the instrument.

The Company determines the classification of its financial assets at initial recognition. In accordance with IAS 39 and the Regulations, financial assets of the Company are classified as financial assets at fair value through profit or loss, available-for-sale financial assets, held-to-maturity financial assets and notes, accounts and other receivables.

Purchase or sale of financial assets and liabilities are recognized using trade date accounting. All financial assets are recognized initially at fair value plus, in the case of investments not at fair value through profit or loss, directly attributable costs.

Financial Assets

a. Classification and subsequent measurement

i. Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss are comprised of financial assets held for trading and financial assets designated upon initial recognition at fair value through profit or loss.

Financial assets acquired for the purpose of selling or repurchasing in the near term, and derivative financial instruments that are not designated as hedging instruments in hedge accounting are classified as financial assets at fair value through profit or loss. Financial assets at fair value through profit or loss are measured at fair value with changes in fair value recognized in profit or loss.

ii. Available-for-sale financial assets

Available-for-sale investments are those non-derivative financial assets that are designated as available-for-sale or are not classified as financial assets at fair value through profit or loss, held-to-maturity financial assets, or loans and receivables. Available-for-sale financial investments are subsequently measured at fair value. Other than impairment losses and foreign exchange gains and losses arising from monetary financial assets which are recognized in profit or loss, subsequent measurement of available-for-sale equity instrument financial assets are recognized in other comprehensive income until the investment is derecognized, at which time the cumulative gain or loss is recognized in profit or loss.

If equity instrument investments do not have quoted prices in an active market and their fair value cannot be reliably measured, then they are classified as financial assets measured at cost on the balance sheet.

iii. Held-to-maturity financial assets

Non-derivative financial assets with fixed or determinable payments and fixed maturities are classified as held-to-maturity when the Company has positive intention and ability to hold them to maturity.

After initial measurement held-to-maturity financial assets are measured at amortized cost using the effective interest rate (EIR) method, less impairment. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or transaction costs that are an integral part of the EIR. The EIR method amortization and impairment, if any, is recognized in profit or loss.

iv. Notes, accounts and other receivables

Notes and accounts receivable are creditors' rights as a result of sales of goods or services. Other receivables are any receivable not classified as notes and accounts receivable. Notes, accounts and other receivables are initially measured and recognized at their fair values. After initial recognition, the notes, accounts and other receivables are subsequently measured at amortized cost using the effective interest method, less impairment. Short-term notes, accounts and other receivables with no stated effective interest rate are measured at the original amount if the effect of discounting is immaterial.

b. Derecognition of financial assets

A financial asset is derecognized when:

- i. the contractual rights to receive cash flows from the asset have expired;
- ii. the Company has transferred assets and substantially all the risks and rewards of the asset have been transferred; or
- iii. the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

On derecognition of a financial asset in its entirety, the difference between the carrying amount and the consideration received or to be received including any cumulative gain or loss that had been recognized in other comprehensive income is recognized in profit or loss.

If the transferred asset is part of a larger financial asset and the part transferred qualifies for derecognition in its entirety, the Company allocates the previous carrying amount of the larger financial asset between the part that continues to be recognized and the part that is derecognized, based on the relative fair values of those parts on the date of the transfer. The difference between the carrying amount allocated to the part derecognized and the sum of the consideration received for the part derecognized and any cumulative gain or loss allocated that had been recognized in other comprehensive income, is recognized in profit or loss. A cumulative gain or loss that had been recognized in other comprehensive income is allocated between the part that continues to be recognized and the part that is derecognized, based on the relative fair values of those parts.

c. Impairment policy

The carrying amount of a financial asset is reduced as a result of impairment, except for accounts receivable for which the carrying amount is reduced through use of an allowance account. When an account receivable is deemed to be uncollectible, it is written off from the allowance account.

i. Notes, accounts and other receivables

The Company first assesses at each reporting date whether objective evidence of impairment exists for notes, accounts and other receivables that are individually significant. If there is objective evidence that an impairment loss has occurred, the amount of impairment loss is assessed individually. For notes, accounts and other receivables other than those mentioned above, the Company groups those assets with similar credit risk characteristics and collectively assess them for impairment. If, in a subsequent period, the amount of the impairment loss decreases, and the decrease can be related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed and recognized through profit or loss. The reversal shall not result in a carrying amount of notes, accounts and other receivables that exceeds what the amortized cost would have been had the impairment not been recognized at the date the impairment is reversed.

ii Other financial assets

The Company assesses, at each reporting date, whether there is objective evidence that a financial asset or a group of financial assets is impaired. A financial asset or a group of financial assets is deemed to be impaired if, and only if, there is objective evidence of impairment as a result of one or more loss events that has occurred since the initial recognition of the asset (an incurred “loss event”) and that loss event has an impact on the estimated future cash flows of the individual financial asset or a set of financial assets.

For equity investments classified as available-for-sale, objective evidence of an impairment would include a significant or prolonged decline in the fair value of the investment below its cost. When there is objective evidence of an impairment for available-for-sale equity securities, the full amount of the losses previously recognized in other comprehensive income is recycled to profit or loss. Impairment losses on equity investments recognized cannot be reversed through profit or loss. Any subsequent increases in their fair value after impairment are recognized in other comprehensive income.

Financial Liabilities

a. Classification and subsequent measurement

The Company classifies the instrument issued as a financial liability or an equity instrument in accordance with the substance of the contractual arrangement and the definitions of a financial liability and an equity instrument.

i. Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss. Gains or losses on the subsequent measurement of liabilities held for trading including interest paid are recognized in profit or loss.

ii. Financial liabilities carried at amortized cost

Financial liabilities measured at amortized cost include interest bearing loans and borrowings that are subsequently measured using the EIR method after initial recognition. Gains and losses are recognized in profit or loss when the liabilities are derecognized as well as through the EIR method amortization process.

Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or transaction costs that are an integral part of the EIR.

b. Derecognition of financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged, cancelled or expires.

When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified (whether or not attributable to the financial difficulty of the debtor), such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognized in profit or loss.

(8) Inventories

Inventories are accounted for on a perpetual basis. Raw materials are stated at actual purchase costs, while the work in process and finished goods are stated at standard costs and subsequently adjusted to weighted-average costs at the end of each month. The cost of work in progress and finished goods comprises raw materials, direct labor, other direct costs and related production overheads. Allocation of fixed production overheads to the costs of conversion is based on the normal capacity of the production facilities. Cost associated with underutilization of capacity is expensed as incurred. Inventories are valued at the lower of cost and net realizable value item by item. Net realizable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

(9) Investments Accounted for Under the Equity Method

The Company accounted for its investments in subsidiaries using equity method and made necessary adjustments in accordance with Article 21 of the Regulations. Such adjustments were made after the Company considered the different accounting treatments to account for its investments in subsidiaries in the consolidated financial statements under IAS 27 “Consolidated and Separate Financial Statements” and the different IFRSs adopted from different reporting entity’s perspectives, and the Company recorded such adjustments by crediting or debiting to investments accounted for under the equity method, share of profit or loss of subsidiaries, associates and joint ventures and share of other comprehensive income of subsidiaries, associates and joint ventures.

Other than those classified as assets held for sale, the Company accounts for its investments in subsidiaries for which it has control, significant influence or jointly control using the equity method.

Significant influence is the power to participate in the financial and operating policy decisions of an entity, but is not control over those policies.

Equity method accounting is effective from the date an investor obtains significant influence over an investee company. Any difference between the cost of the investment and the investor's share of the net fair value of the investee company's identifiable assets and liabilities are accounted for as follows:

- a. Goodwill relating to an investee company is included in the carrying amount of the investment. Amortization of goodwill is not permitted.
- b. Any excess of the investor's share of the net fair value of the investee company's identifiable assets and liabilities over the cost of the investment is recognized as income in the determination of the investor's share of the investee company's profit or loss in the period in which the investment is acquired.

Under the equity method, the investment in the investee company is carried in the balance sheet at cost plus post acquisition changes in the Company's share of profit or loss and other comprehensive income of the investee company. The Company's share of profit or loss of the investee company is recognized in the Company's profit or loss. Distributions received from an investee company reduce the carrying amount of the investment. The Company's share of any changes in the investee company's other comprehensive income is recognized directly in other comprehensive income of the Company. After the interest in the investee company is reduced to zero, additional losses are provided for and a liability is recognized only to the extent that the Company has incurred legal or constructive obligations to make payments on behalf of the investee company. Unrealized gains and losses resulting from transactions between the Company and the investee company are eliminated to the extent of the interest in the investee company.

When changes in the net assets of investee were not resulted from their profit or loss or other comprehensive income, and such changes do not affect the Company's ownership percentages, the Company recognizes its proportionate share of the changes in equity. Upon subsequent disposal of the investments, the Company reclassifies the aforementioned adjusted equity item to profit or loss on a pro rata basis.

When the investee issues new shares and the Company's ownership interest changes because the Company's subscription of new shares was not proportionate to its ownership percentage, the changes in net assets disproportionate to its existing ownership are recorded to the additional paid-in capital and investments accounted for under the equity method. Furthermore, when the ownership interest decreased, the cumulative amounts previously recognized in other comprehensive income are reclassified to profit or loss or other appropriate items on a pro rata basis. The aforementioned additional paid-in capital is reclassified to profit or loss on a pro rata basis when the Company disposes of the investee.

Financial statements of investee companies are prepared for the same reporting period as the Company. Where necessary, adjustments are made to bring the accounting policies in line with those of the Company. Upon an investee company's issuance of new shares, if the Company takes up more shares than its original proportionate holding while maintaining its significant influence over that investee company, such increase would be accounted for as an acquisition of an additional equity interest in the investee company. Upon an investee company's issuance of new shares, if the Company does not take up proportionate shares and reduces its shareholding percentage while maintaining its significant influence over that investee company, a proportionate share of the gain or loss previously recognized in other comprehensive income is reclassified to profit and loss. Any remaining differences will be charged to additional paid-in capital.

The Company determines at each reporting date whether there is any objective evidence that the investment in the investee company is impaired. If this is the case, the Company calculates the amount of impairment as the difference between the recoverable amount of the investee company and its carrying value, and recognizes such amount in profit or loss in the statement of comprehensive income.

The Company ceases to use the equity method upon loss of significant influence over the investee company. If the investment does not result in a subsidiary or joint venture as defined by IAS 31 "Interests in Joint Ventures", it will be accounted for in accordance with IAS 39. Any difference between the carrying amount of the investee company upon loss of significant influence and the fair value of the retained investment and proceeds from disposal is recognized in profit or loss.

(10) Property, Plant and Equipment

Property, plant and equipment is stated at cost, net of accumulated depreciation and accumulated impairment losses, if any, and any borrowing costs incurred for long-term construction projects are capitalized if the recognition criteria are met. Significant renewals, improvements and major inspections meeting the recognition criteria are treated as capital expenditures, and the carrying amounts of those replaced parts are derecognized. Maintenance and repairs are recognized in profit or loss as incurred. Any gain or loss arising from derecognition of the assets is recognized in other operating income and expenses.

Depreciation is calculated on a straight-line basis over the estimated economic lives. A significant part of an item of property, plant and equipment which has a different useful life from the remainder of the item is depreciated separately.

The depreciation methods, useful lives and residual values for the assets are reviewed at each fiscal year end, and the differences resulted from the previous estimation are recorded as changes in accounting estimates.

Except for land, which is not depreciated, the estimated economic lives of the assets are as follows:

Buildings	20~56 years
Machinery and equipment	6 years
Transportation equipment	6 years
Furniture and fixtures	6 years

(11) Intangible Assets

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in fair value as at the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and accumulated impairment losses, if any. Internally generated intangible assets which fail to meet the recognition criteria are not capitalized and the expenditures are reflected in profit or loss in the period incurred.

The useful lives of intangible assets are assessed as either finite or indefinite.

Intangible assets with finite lives are amortized over the useful economic life and assessed for impairment whenever there is an indication that the intangible assets may be impaired. The amortization period and the amortization method for an intangible asset with a finite useful life are reviewed at least at the end of each fiscal year. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset is accounted for by changing the amortization period or method, as appropriate, and is treated as changes in accounting estimates.

Intangible assets with indefinite useful lives are not amortized, but are tested for impairment annually, either individually or at the cash-generating unit level. The assessment of indefinite life is reviewed annually to determine whether the indefinite life continues to be supportable. If not, the change in useful life from indefinite to finite is made on a prospective basis.

Gains or losses arising from derecognition of an intangible asset are recognized in other operating income and expenses.

Accounting policies of the Company's intangible assets are summarized as follows:

- a. Software is amortized over 3 years on a straight-line basis.
- b. Patent and technology license fee: Upon signing of contract and obtaining the right to intellectual property, any portion attributable to non-cancellable and mutually agreed future fixed license fees for patent and technology is discounted, and recognized as an intangible asset and related liability. The cost of the intangible asset is not revalued once determined on initial recognition, and is depreciated over the economic life (10 years) on a straight-line basis. Interest expenses from the related liability are recognized and calculated based on the effective interest rate method. Based on the timing of payments, the liability is classified as current and non-current.
- c. Others are mainly the intellectual property license fees and amortized over the shorter of the contract term or estimated economic life (3 years) of the related technology on a straight-line basis.

(12) Impairment of Non-financial Assets

The Company assesses at each reporting date whether there is an indication that an asset in the scope of IAS 36 may be impaired. If any indication exists, the Company completes impairment testing for the cash-generating unit (CGU) to which the individual assets belong. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. The recoverable amount is the higher of an asset's or CGU's fair value less costs to sell and its value-in-use and is determined for an individual asset or CGU. If circumstances indicate that previously recognized impairment losses may no longer exist or may have decreased at each reporting date, the Company re-assesses the asset's or CGU's recoverable amount. A previously recognized impairment loss is reversed only if there has been an increase in the estimated service potential of an asset which in turn increases the recoverable amount since the last impairment loss was recognized. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation or amortization, had no impairment loss been recognized for the asset in prior years.

The recognition or reversal of impairment losses is classified as other operating income and expenses.

(13) Bonds

Convertible Bonds

The Company evaluates the terms of the convertible bonds issued to determine whether it contains both a liability and an equity component. Furthermore, the Company assesses if the economic characteristics and risks of the put and call options embedded in the convertible bonds are closely related to the economic characteristics and risk of the host contract before separating the equity element.

For the liability component excluding the derivatives, its fair value is determined based on the rate of effective interest applied at that time by the market to instruments of comparable credit status. The liability component is classified as a financial liability measured at amortized cost using the effective interest method before the instrument is converted or settled. For the embedded derivative that is not closely related to the host contract, it is classified as a liability component and subsequently measured at fair value through profit or loss unless it qualifies as an equity component. The equity component is assigned the residual amount after deducting from the fair value of the instrument as a whole the amount separately determined for the liability component. Its carrying amount is not remeasured in the subsequent accounting periods. If the convertible bond issued does not have an equity component, it is accounted for as a hybrid instrument in accordance with the requirements under IAS 39.

If the convertible bondholders exercise their conversion right before maturity, the Company shall adjust the carrying amount of the liability component. The adjusted carrying amount of the liability component at conversion and the carrying amount of equity component are credited to common stock and additional paid-in capital - premiums. No gain or loss is recognized upon bond conversion.

In addition, the liability component of convertible bonds is classified as a current liability within 12 months of the date the bondholders may exercise the put right. After the put right expires, the liability component of the convertible bonds should be reclassified as a non-current liability if it meets the definition of a non-current liability in all other respects.

Exchangeable Bonds

In accordance with IAS 39, if the economic and risk characteristics of the embedded call or put options are not clearly and closely related to the host contract, the derivative financial instruments embedded in exchangeable bonds would be recognized separately as financial assets or liabilities at fair value through profit or loss.

The Company also has exchangeable bonds where the bondholders may exchange the bonds into ordinary shares of certain public entities which the Company holds as available-for-sale financial assets. When exchangeable bondholders exercise their right to exchange their bonds for reference shares, the book value of the bonds is offset against the book value of the investments in reference shares and the related stockholders' equity accounts, with the difference recognized as a gain or loss on disposal of investments.

Both the host contract and bifurcated embedded derivative financial instrument in exchangeable bonds are classified as current liabilities if the bondholders have the right to demand settlement by exercising the exchange option of the bonds.

(14) Post-Employment Benefits

All regular employees are entitled to a defined benefit pension plan that is managed by an independently administered pension fund committee. Fund assets are deposited under the committee's name with the Bank of Taiwan and hence, not associated with the Company. Therefore, fund assets are not to be included in the Company's parent company only financial statements. Pension benefits for employees of the overseas branch are provided in accordance with the local regulations.

The Labor Pension Act of the R.O.C. (the Act), which adopts a defined contribution plan, became effective on July 1, 2005. Employees eligible for the Labor Standards Law, a defined benefit plan, were allowed to elect either the pension calculation under the Act or continue to be subject to the pension calculation under the Labor Standards Law. Those employees that elected to be subject to the Act will have their seniority achieved under the Labor Standards Law retained upon election of the Act, and the Company will make monthly contributions of no less than 6% of these employees' monthly wages to the employees' individual pension accounts. Oversea branch makes contribution to the respective benefit plans based on the specific percentage requirement of local regulations. Post-employment benefit plan that is classified as a defined benefit plan is accounted for under the Projected Unit Credit Method to measure its obligations and costs based on actuarial assumptions. The Company recognizes all actuarial gains and losses in the periods which they occur in other comprehensive income, which then is immediately recognized in retained earnings.

(15) Treasury Stock

Own equity instruments repurchased (treasury shares) are recognized at repurchase cost and deducted from equity. Any difference between the carrying amount and the consideration is recognized in equity.

(16) Share-Based Payment

The cost of equity-settled transactions between the Company and its employees is measured based on the fair value at the date on which they are granted. The fair value of the equity instruments is determined using an appropriate pricing model.

The cost of equity-settled transactions is recognized, together with a corresponding increase in other capital reserves in equity, over the periods in which the performance and/or service conditions are being fulfilled. The cumulative expense recognized for equity-settled transactions at each reporting date reflects the extent to which the vesting period has passed and the Company's best estimate of the quantity of equity instruments that will ultimately vest. The charge to income statement for a period represents the movement in cumulative expense recognized between the beginning and end of that period.

No expense will be recognized for awards that do not ultimately vest, except for equity-settled transactions for which vesting is conditional upon a market or non-vesting condition. These are treated as vested irrespective of whether the market or non-vesting condition is satisfied, provided that all other performance and/or service conditions are satisfied.

Where the terms of an equity-settled transaction award are modified, the minimum expense recognized is the expense as if the terms had not been modified, if the original terms of the award are met. An additional expense is recognized for any modification that increases the total fair value of the share-based payment transaction, or is otherwise beneficial to the employee as measured at the date of modification.

Where an equity-settled award is cancelled, it is treated as if it fully vests on the date of cancellation, and any expense not yet recognized for the award is recognized immediately. This includes any award where non-vesting conditions within the control of either the entity or the employee are not met. However, if a new award substitutes for the cancelled award and is designated as a replacement award on the date that it is granted, the cancelled and new awards are treated as if they were a modification of the original award.

The dilutive effect of outstanding options is reflected as additional share dilution in the computation of diluted earnings per share.

(17) Revenue Recognition

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured. Revenue is measured at the fair value of the consideration received or to be received. The recognition criteria and methods are described below:

Sales revenue

Revenue from sale of goods is recognized when all the following conditions have been satisfied:

- a. the significant risks and rewards of ownership of the goods have transferred to the buyer;
- b. neither continuing managerial involvement nor effective control over the goods sold have been retained;
- c. the amount of revenue can be measured reliably;
- d. it is probable that the economic benefits associated with the transaction will flow to the entity; and
- e. the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Sales returns and discounts are estimated based on history of customer complaints, historical experiences and any other known factors that might significantly affect the estimation and recorded in the same period in which sales are made.

Interest income

For financial assets measured at amortized cost (including held-to-maturity financial assets) and financial assets at fair value through profit or loss, interest income is recorded using the effective interest rate and recognized in profit or loss.

Dividends

Revenue is recognized when the Company's right to receive the payment is established.

(18) Income Tax

Income tax expense (benefit) is the aggregate amount of current income tax and deferred income tax included in the determination of profit or loss for the period.

Current income tax

Current income tax assets and liabilities for the current period and prior periods are measured using the tax rates and tax laws that have been enacted or substantively enacted by the end of the reporting period. Current income tax relating to items recognized directly in other comprehensive income or equity is recognized in other comprehensive income or equity rather than profit or loss.

The additional 10% income tax for undistributed earnings is recognized as income tax expense in the subsequent year when the distribution proposal is approved by stockholders' meeting.

Deferred income tax

Deferred income tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts in financial statements at the reporting date.

Deferred tax liabilities are recognized for all taxable temporary differences, except:

- a. When the deferred tax liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss;
- b. In respect of taxable temporary differences associated with investments in subsidiaries, associates and joint ventures, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not be reversed in the foreseeable future.

Deferred tax assets are recognized for all deductible temporary differences, carry forward of unused tax credits and any unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilized, except:

- a. Where the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss;

- b. In respect of deductible temporary differences associated with investments in subsidiaries, associates and joint ventures, deferred tax assets are recognized only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilized.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realized or the liability is settled, based on tax rates and tax laws that have been enacted or substantively enacted at the reporting date. The measurement of deferred tax assets and liabilities reflects the tax consequences that would follow the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities. Deferred tax relating to items not relating to profit or loss is not recognized in profit or loss but rather in other comprehensive income or directly in equity. Deferred tax assets are reassessed and recognized at each reporting date. Unrecognized deferred tax assets are reassessed at each reporting date and are recognized to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities offset each other, if a legally enforceable right exists to set off current income tax assets against current income tax liabilities, and the deferred taxes relate to the same taxable entity and the same taxation authority.

(19) Earnings per Share

Earnings per share is computed according to IAS 33, "Earnings Per Share". Basic earnings per share is computed by dividing net income by the weighted-average number of ordinary shares outstanding during the current reporting period. Diluted earnings per share is computed by taking basic earnings per share into consideration plus additional ordinary shares that would have been outstanding if the dilutive share equivalents had been issued. Net income is also adjusted for interest and other income or expenses derived from any underlying dilutive share equivalents. The weighted-average of outstanding shares is adjusted retroactively for stock dividends and employee stock bonus issues.

5. SIGNIFICANT ACCOUNTING JUDGMENTS, ESTIMATES AND ASSUMPTIONS

The preparation of the Company's parent company only financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets, liabilities, the accompanying disclosures and the disclosure of contingent liabilities. However, uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

The key assumptions concerning the future and other key sources of estimation for uncertainty at the reporting date, that would have a significant risk for a material adjustment to the carrying amounts of assets or liabilities within the next fiscal year are discussed below.

The Company bases its assumptions and estimates on information available when the parent company only financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

(1) The Fair Value of Financial Instruments

Where the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be derived from active markets, they are determined using valuation techniques including income approach (for example, the discounted cash flows model) or the market approach. Changes in assumptions about these factors could affect the reported fair value of the financial instruments. Please refer to Note 12 for more details.

(2) Derivative Instruments

The embedded derivative features contained in exchangeable bonds are bifurcated and separately accounted for if the economic characteristics and risks of the embedded derivative instruments are not clearly and closely related to those of the host contracts. Those bifurcated embedded derivatives are fair valued at the end of each reporting period by using the option pricing model with the changes in fair value included in earnings. The valuation model uses the market-based observable inputs including share price, volatility, credit spread and swap rates.

(3) Inventories

Inventories are valued at lower of cost and net realizable value item by item. Net realizable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale. Please refer to Note 6(4). Costs of completion include direct labor and overhead, including depreciation and maintenance of production equipment, indirect labor costs, indirect material costs, supplies, utilities and royalties that is expected to be incurred at normal production level. The Company estimates normal production level taking into account loss of capacity resulting from planned maintenance, based on historical experience and current production capacity.

(4) Post-Employment Benefits

Cost of post-employment benefit pension plan and the present value of the pension obligation are determined using actuarial valuations. An actuarial valuation involves making various assumptions which may differ from actual developments in the future. These include the determination of the discount rate, future salary increases and mortality rates. Due to the complexity of the valuation, the underlying assumptions and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date. The assumptions used for measuring pension cost and the present value of the pension obligation are disclosed in Note 6(14).

In determining the appropriate discount rate, management considers the interest rates of the government bonds and in determining rate of future salary increase, management takes account of past experiences, comparisons within the industry and the geographical region, inflation and the discount rate.

(5) Share-Based Payment Transactions

The Company measures the cost of equity-settled transactions with employees based on reference to the fair value of the equity instruments at the date at which they are granted. Estimating fair value for share-based payment transactions requires determination of the most appropriate valuation model, which is dependent on the terms and conditions of the grant. This estimate also requires determination of the most appropriate inputs to the valuation model including the expected life of the share option, volatility and dividend yield and making assumptions about them. The assumptions and models used for estimating fair value for share-based payment transactions are disclosed in Note 6(16).

(6) Revenue Recognition-Sales Returns and Discounts

The Company estimates sales returns and discounts based on customer complaints, historical experience and other known factors at the time of sale, which reduces the sales revenue.

(7) Impairment of Property, Plant and Equipment

At each reporting date or whenever events indicate that the asset's value has declined or significant changes in the market with an adverse effect have taken place, the Company assesses whether there is an indication that an asset in the scope of IAS 36 may be impaired. If any indication exists, the Company completes impairment testing for the CGU to which the individual assets belong. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. An asset's recoverable amount is the higher of an asset's or CGU's fair value less costs to sell and its value in use and is determined for an individual asset. The fair value less costs to sell is based on best information available to reflect the amount that an entity could obtain from the disposal of the asset in an arm's length transaction between knowledgeable, willing parties, after deducting the costs of disposal. The value-in-use is measured at the net present value of the future cash flows the entity expects to derive from the asset or CGU. Cash flow projection involves subjective judgments and estimates which include the estimated useful lives of property, plant and equipment, capacity that generates future cash flows, capacity of physical output, potential fluctuations of economic cycle in the industry and the Company's operating situation.

(8) Income Tax

Uncertainties exist with respect to the interpretation of complex tax regulations, changes in tax laws, and the amount and timing of future taxable income. The Company establishes provisions, based on reasonable estimates, for possible consequences of audits by the tax authority. The amount of such provisions is based on various factors, such as experience of previous tax audits and differing interpretations of tax regulations by the responsible tax authority.

Deferred tax assets are recognized for all carryforward of unused tax losses, tax credits and deductible temporary differences to the extent that it is probable that future taxable profit will be available or there are sufficient taxable temporary differences against which the unused tax losses, unused tax credits or deductible temporary differences can be utilized. The amount of deferred tax assets determined to be recognized is based upon the likely timing and the level of future taxable profits and taxable temporary differences. Please refer to Note 6(21) for more details on unrecognized deferred tax assets as of December 31, 2013.

6. CONTENTS OF SIGNIFICANT ACCOUNTS

(1) CASH AND CASH EQUIVALENTS

	As of		
	December 31, 2013	December 31, 2012	January 1, 2012
Cash on hand	\$2,468	\$2,421	\$2,442
Checking and savings accounts	4,143,846	4,908,768	8,759,429
Time deposits	28,094,053	24,623,240	20,636,989
Repurchase agreements collateralized by government bonds and corporate bonds	3,773,718	2,188,655	1,422,549
Total	<u>\$36,014,085</u>	<u>\$31,723,084</u>	<u>\$30,821,409</u>

(2) FINANCIAL ASSETS AT FAIR VALUE THROUGH PROFIT OR LOSS-CURRENT

	As of		
	December 31, 2013	December 31, 2012	January 1, 2012
Designated financial assets at fair value through profit or loss			
Convertible bonds	\$-	\$-	\$90,630
Subtotal	-	-	90,630
Financial assets held for trading			
Listed stocks	234,583	256,685	202,081
Corporate bonds	398,681	399,309	403,220
Subtotal	633,264	655,994	605,301
Total	<u>\$633,264</u>	<u>\$655,994</u>	<u>\$695,931</u>

(3) ACCOUNTS RECEIVABLE, NET

	As of		
	December 31, 2013	December 31, 2012	January 1, 2012
Accounts receivable	\$8,470,117	\$9,760,686	\$8,616,732
Less: allowance for sales returns and discounts	(260,819)	(130,610)	(89,446)
Less: allowance for doubtful accounts	-	-	(8,126)
Net	<u>\$8,209,298</u>	<u>\$9,630,076</u>	<u>\$8,519,160</u>

Aging analysis of account receivables:

	As of		
	December 31, 2013	December 31, 2012	January 1, 2012
Neither past due nor impaired	\$6,531,714	\$8,230,291	\$7,660,403
Past due but not impaired:			
≤ 30 days	1,445,026	1,343,288	741,538
31 to 60 days	226,124	50,202	92,512
61 to 90 days	4,873	2,288	14,185
91 to 120 days	375	16	1,246
> 120 days	1,186	3,991	9,276
Subtotal	1,677,584	1,399,785	858,757
Total	<u>\$8,209,298</u>	<u>\$9,630,076</u>	<u>\$8,519,160</u>

Movement on allowance for individual evaluation doubtful accounts:

	For the years ended December 31,	
	2013	2012
Beginning balance	\$-	\$8,126
Net charge for the period	-	(8,126)
Ending balance	<u>\$-</u>	<u>\$-</u>

The terms for third party domestic sales were net 30~60 days, while the collection periods for third party overseas sales were month end 30~60 days.

(4) INVENTORIES, NET

	As of		
	December 31, 2013	December 31, 2012	January 1, 2012
Raw materials	\$1,691,822	\$1,566,802	\$1,660,846
Supplies and spare parts	1,811,545	1,749,849	1,884,581
Work in process	8,425,481	9,330,171	7,622,934
Finished goods	1,021,586	1,276,966	873,317
Total	12,950,434	13,923,788	12,041,678
Less: allowance for inventory valuation losses	(1,306,090)	(2,072,297)	(1,562,730)
Net	<u>\$11,644,344</u>	<u>\$11,851,491</u>	<u>\$10,478,948</u>

a. For the years ended December 31, 2013, the Company recognized NT\$84,674 million for costs of inventories in expenses, of which NT\$770 million was related to gains recognized when the circumstances that caused the net realizable value of inventory to be lower than its cost no longer existed. For the years ended December 31, 2012, the Company recognized NT\$81,182 million for costs of inventories in expenses, of which NT\$519 million was losses as a result of the net realizable value of inventory being lower than its cost.

b. Inventories were not pledged.

(5) AVAILABLE-FOR-SALE FINANCIAL ASSETS

	As of		
	December 31, 2013	December 31, 2012	January 1, 2012
Common stocks	\$15,145,697	\$17,742,030	\$20,067,314
Preferred stocks	312,600	165,300	181,200
Funds	56,434	87,842	73,606
Total	<u>\$15,514,731</u>	<u>\$17,995,172</u>	<u>\$20,322,120</u>
Current	\$2,134,379	\$4,330,880	\$5,124,780
Noncurrent	13,380,352	13,664,292	15,197,340
Total	<u>\$15,514,731</u>	<u>\$17,995,172</u>	<u>\$20,322,120</u>

The Company issued bonds that are exchangeable at any time on or after January 1, 2010 and prior to November 22, 2014, into common stocks originally classified as available-for-sale financial assets, noncurrent. Therefore, the Company classified the exchangeable common stock as current assets.

(6) FINANCIAL ASSETS MEASURED AT COST, NON-CURRENT

	As of		
	December 31, 2013	December 31, 2012	January 1, 2012
Common stocks	\$196,071	\$196,071	\$196,071
Preferred stocks	263,520	263,520	263,520
Total	<u>\$459,591</u>	<u>\$459,591</u>	<u>\$459,591</u>

Since these financial assets mostly consist of non-publicly traded stocks, for which the fair value cannot be reliably measured due to lack of sufficient financial information available, the Company measures these financial assets at cost.

(7) INVESTMENTS ACCOUNTED FOR UNDER THE EQUITY METHOD

a. Details of investments accounted for under the equity method are as follows:

Investee companies	As of

UNIMICRON HOLDING LIMITED	626,021	21.93
Total	<u>\$45,004,050</u>	

Note A: As of December 31, 2013, 2012 and 2011, the costs of investment were NT\$5,524 million, NT\$5,396 million and NT\$5,839 million, respectively. After deducting the Company's stock held by the subsidiary (treated as treasury stock by the Company) of NT\$120 million, the residual book values totaled NT\$5,404 million, NT\$5,277 million and NT\$5,719 million as of December 31, 2013, 2012 and 2011, respectively.

Note B: During March 2005, the Company received an offer of approximately 106 million ordinary shares from Best Elite International Limited (Best Elite), the holding company of HeJian Technology Corp. (HeJian). The offered shares represented approximately 50% of Best Elite's outstanding ordinary shares and approximately 15% of the total outstanding shares of Best Elite. The Company filed an inquiry with the Investment Commission of the Ministry of Economic Affairs on March 18, 2005 (Ref. No. 94-Lian-Tung-Tzu-0222), for their executive guidance with respect to the offer. Subsequent to Best Elite Board approval, the offered ordinary shares were placed in a trust while the Company awaited the Investment Commission's guidance. While in trust, the Company could not receive ownership (nor any potential stock dividend or cash dividend distributed) and was not the beneficiary thereof unless the Company received approval from the Investment Commission. In the event that any stock dividend or cash dividend was distributed, the Company's potential stake in Best Elite would have accumulated accordingly.

No response from the Investment Commission of the Ministry of Economic Affairs was received on the Company's inquiry for many years. In June 2011, the Company filed an application for the acquisition of the aforementioned donated Best Elite shares as well as for an additional purchase of Series B and B-1 preferred shares (Note C). Thereafter, on November 1, 2011, the Company received the approval letter from the Investment Commission of the Ministry of Economic Affairs (Ref. No. Jing-Shen-Er-Zi-10000274530). With such an approval, the Company was able to formally accept the ordinary shares, which have been held in trust since 2006. Based on the approval letter from the Investment Commission of the Ministry of Economic Affairs, which designated the ordinary shares offered by Best Elite as a donation, the Company recognized the said shares at their fair value of USD 23 million on the day of transfer, December 12, 2011, as a long term investment accounted for under the equity method with a corresponding gain recorded in other income.

Note C: On March 16, 2011, in order to achieve its global market objectives, the Company's Board of Directors approved an offer to the stockholders of Best Elite to purchase up to 30% of the preferred shares of Best Elite. In June 2011, the Company filed an application on the 15.34% donated shares (in trust as described above) as well as 20.41% of the preferred shares of Best Elite based on the said stockholders' offering. Such purchase of 20.41% of the preferred shares of Best Elite was approved on November 1, 2011 in the same letter from the Investment Commission of the Ministry of Economic Affairs (Ref. No. Jing-Shen-Er-Zi-10000274530) granting approval for the Company's ownership of Best Elite ordinary shares placed in trust. Pursuant to such approval, the Company acquired by way of purchase at fair value Series B and B-1 preferred shares representing 19.56% of Best Elite's total outstanding shares on December 12, 2011 and the Company thereby increased its cumulative ownership in Best Elite to 34.90%. The Company accounted for its investment as a long term investment under the equity method in accordance with IAS 28 "Investment in Associates". The Company acquired an additional 48.07% of Best Elite's total outstanding shares on February 1, 2013 and obtained control of Best Elite accordingly. The transaction resulted in a bargain purchase gain of NT\$7,140 million, which was mainly attributed to the Company's unique position to better utilize the assets, such as improving utilization, and the lack of liquidity of Best Elite's shares

Certain investments accounted for under the equity method were audited by other independent accountants. Shares of investment income from these subsidiaries, associates and joint ventures amounted to NT\$191 million and NT\$64 million for the years ended December 31, 2013 and 2012, respectively. Share of other comprehensive income (loss) from these subsidiaries, associates and joint ventures amounted to NT\$254 million and NT\$(168) million for the years ended December 31, 2013 and 2012, respectively. The balances of investments accounted for under the equity method were NT\$ 3,888 million, NT\$4,118 million and NT\$4,276 million as of December 31, 2013, December 31, 2012 and January 1, 2012, respectively.

No investment accounted for using the equity method was pledged.

- b. The summarized financial information of the Company's investments in associates are as follows:

	As of		
	December 31, 2013	December 31, 2012	January 1, 2012
Total assets(100%)	\$20,354,647	\$35,110,333	\$33,402,514
Total liabilities(100%)	4,922,141	7,854,487	8,322,911
	For the years ended December 31,		
	2013	2012	
Revenue(100%)	\$4,220,539	\$12,129,166	
Net income(100%)	1,464,128	3,083,447	

- c. The Company's associate, HSUN CHIEH INVESTMENT CO., LTD., held 441 million shares of the Company's stock as of December 31, 2013 and 2012.

As of December 31, 2012, the Company identified that certain property, plant and equipment would not generate the expected future cash flows. The Company determined the recoverable amounts of these assets based on the fair values less costs to sell. The impairment test revealed that the total carrying amount of these assets was greater than their total recoverable amount. After considering the relevant objective evidence, the Company recorded an impairment loss of NT\$65 million for the year ended December 31, 2012.

- a. The amounts of total interest expense before capitalization of borrowing costs were NT\$623 million and NT\$518 million for the years ended December 31, 2013 and 2012, respectively. Details of capitalized borrowing costs are as follows:

	For the years ended December 31,	
	2013	2012
Land	\$-	\$143
Buildings	43,199	7,516
Machinery and equipment	142,998	260,044

A. On December 2, 2009, the Company issued SGX-ST listed zero coupon exchangeable bonds. The terms and conditions of the bonds are as follows:

a. Issue Amount: US\$127.2 million

b. Period: December 2, 2009 ~ December 2, 2014 (Maturity date)

c. Redemption:

- i. The Company may redeem the bonds, in whole or in part, after 12 months of the issuance and prior to the maturity date, at the principal amount of the bonds with an interest calculated at the rate of -0.5% per annum (the Early Redemption Price) if the closing price of the ordinary shares of Unimicron Technology Corporation (Unimicron) on the TSE, translated into US dollars at the prevailing exchange rate, for a period of 20 consecutive trading days, the last of which occurs not more than 10 days prior to the date upon which notice of such redemption is published, is at least 130% of the exchange price then in effect translated into US dollars at the rate of NTD 32.197=USD 1.00.

- ii. The Company may redeem the bonds, in whole, but not in part, at the Early Redemption Price if at least 90% in principal amount of the bonds has already been exchanged, redeemed or purchased and cancelled.
 - iii. The Company may redeem all, but not part, of the bonds, at the Early Redemption Price at any time, in the event of certain changes in the R.O.C.'s tax rules which would require the Company to gross up for payments of principal, or to gross up for payments of interest or premium.
 - iv. All, or any portion, of the bonds would be redeemable in US dollars at the option of bondholders on December 2, 2011 at 99% of the principal amount.
 - v. Bondholders have the right to require the Company to redeem all or any portion of the bonds at the Early Redemption Price if the ordinary shares of the exchanged securities are officially delisted on the TSE for a period of five consecutive trading days.
 - vi. In the event that a change of control as defined in the indenture of the bonds occurs to the Company or Unimicron, the bondholders shall have the right to require the Company to redeem the bonds, in whole or in part, at the Early Redemption Price.
- d. Terms of Exchange
- i. Underlying Securities: Ordinary shares of Unimicron
 - ii. Exchange Period: The bonds are exchangeable at any time on or after January 1, 2010 and prior to November 22, 2014, into Unimicron ordinary shares; provided, however, that if the exercise date falls within 5 business days from the beginning of, and during, any closed period, the right of the exchanging holder of the bonds to vote with respect to the shares it receives will be subject to certain restrictions.
 - iii. Exchange Price and Adjustment: The exchange price was originally NT\$51.1875 per share, determined on the basis of a fixed exchange rate of NTD 32.197=USD 1.00. The exchange price will be subject to adjustments upon the occurrence of certain events set out in the indenture. The exchange price was NT\$43.3650 per share on December 31, 2013.
- e. Redemption on the Maturity Date: On the maturity date, the Company will redeem the bonds at 97.53% of the principal amount unless, prior to such date:
- i. The Company shall have redeemed the bonds at the option of the Company, or the bonds shall have been redeemed at option of the bondholder;
 - ii. The bondholders shall have exercised the exchange right before maturity; or
 - iii. The bonds shall have been redeemed or purchased by the Company and cancelled.

B. On December 2, 2009, the Company issued SGX-ST listed zero coupon exchangeable bonds. The terms and conditions of the bonds are as follows:

a. Issue Amount: US\$80 million

b. Period: December 2, 2009 ~ December 2, 2014 (Maturity date)

c. Redemption:

- i. The Company may redeem the bonds, in whole or in part, after 12 months of the issuance and prior to the maturity date, at the principal amount of the bonds with an interest calculated at the rate of -0.5% per annum (the Early Redemption Price) if the closing price of the ordinary shares of Novatek Microelectronics Corp., Ltd. (Novatek) on the TSE, translated into US dollars at the prevailing exchange rate, for a period of 20 consecutive trading days, the last of which occurs not more than 10 days prior to the date upon which notice of such redemption is published, is at least 130% of the exchange price then in effect translated into US dollars at the rate of NTD 32.197=USD 1.00.
- ii. The Company may redeem the bonds, in whole, but not in part, at the Early Redemption Price if at least 90% in principal amount of the bonds has already been exchanged, redeemed or purchased and cancelled.
- iii. The Company may redeem all, but not part, of the bonds, at the Early Redemption Price at any time, in the event of certain changes in the R.O.C.'s tax rules which would require the Company to gross up for payments of principal, or to gross up for payments of interest or premium.
- iv. All, or any portion, of the bonds would be redeemable in US dollars at the option of bondholders on December 2, 2011 at 99% of the principal amount.
- v. Bondholders have the right to require the Company to redeem all or any portion of the bonds at the Early Redemption Price if the ordinary shares of the exchanged securities are officially delisted on the TSE for a period of five consecutive trading days.
- vi. In the event that a change of control as defined in the indenture of the bonds occurs to the Company or Novatek, the bondholders shall have the right to require the Company to redeem the bonds, in whole or in part, at the Early Redemption Price.

d. Terms of Exchange

- i. Underlying Securities: Ordinary shares of Novatek
- ii. Exchange Period: The bonds are exchangeable at any time on or after January 1, 2010 and prior to November 22, 2014, into Novatek ordinary shares; provided, however, that if the exercise date falls within 5 business days from the beginning of, and during, any closed period, the right of the exchanging holder of the bonds to vote with respect to the shares it receives will be subject to certain restrictions.

- iii. Exchange Price and Adjustment: The exchange price was originally NT\$108.58 per share, determined on the basis of a fixed exchange rate of NTD 32.197=USD 1.00. The exchange price will be subject to adjustments upon the occurrence of certain events set out in the indenture.
 - e. Exchange of the Bonds

As of December 31, 2013 and 2012, certain bondholders have exercised their rights to exchange their bonds with the total principal amount of US\$77 million and US\$43 million into Novatek shares. Gains from disposal of investments and gains from exchange of bonds from bondholders exercising exchange rights during the years ended December 31, 2013 and 2012 amounted NT\$1,137 million and NT\$1,389 million, respectively, and were recognized as other gains and losses.
 - f. Bonds early redemption :

Since over 90% principal amount of the bonds has already been exchanged, the Company redeemed the bonds in whole at the Early Redemption Price on July 22, 2013. The remaining principal amount of the redeemed bonds was US\$3 million. the Company recognized a gain of NT\$45 million from the redemption and classified the gain as other gains and losses.
 - g. Redemption on the Maturity Date: On the maturity date, the Company will redeem the bonds at 97.53% of the principal amount unless, prior to such date:
 - i. The Company shall have redeemed the bonds at the option of the Company, or the bonds shall have been redeemed at option of the bondholder;
 - ii. The bondholders shall have exercised the exchange right before maturity; or
 - iii. The bonds shall have been redeemed or purchased by the Company and cancelled.
- C. On May 24, 2011, the Company issued SGX-ST listed currency linked zero coupon convertible bonds. The terms and conditions of the bonds are as follows:
- a. Issue Amount: US\$500 million
 - b. Period: May 24, 2011 ~ May 24, 2016 (Maturity date)
 - c. Redemption:
 - i. The Company may redeem the bonds, in whole or in part, after 3 years of the issuance and prior to the maturity date, at the principal amount of the bonds with an interest calculated at the rate of -0.25% per annum (the Early Redemption Amount) if the closing price of the Company's ADS on the New York Stock Exchange, for a period of 20 out of 30 consecutive ADS trading days, the last of which occurs not more than 5 ADS trading days prior to the date upon which notice of such redemption is published, is at least 130% of the conversion price. The Early Redemption Price will be converted into NTD based on the Fixed Exchange Rate (NTD 28.846=USD 1.00), and this fixed NTD amount will be converted using the prevailing rate at the time of redemption for payment in USD.

- ii. The Company may redeem the bonds, in whole, but not in part, at the Early Redemption Amount if at least 90% in principal amount of the bonds has already been converted, redeemed or repurchased and cancelled.
 - iii. The Company may redeem all, but not part, of the bonds, at the Early Redemption Amount at any time, in the event of certain changes in the R.O.C.'s tax rules which would require the Company to gross up for payments of principal, or to gross up for payments of interest or premium.
 - iv. All or any portion of the bonds will be redeemable at Early Redemption Amount at the option of bondholders on May 24, 2014 at 99.25% of the principal amount.
 - v. Bondholders have the right to require the Company to redeem all of the bonds at the Early Redemption Amount if the Company's ADS cease to be listed or admitted for trading on the New York Stock Exchange, or the Company's ordinary shares cease to be listed on the Taiwan Stock Exchange.
 - vi. In the event that a change of control as defined in the indenture of the bonds occurs to the Company, the bondholders shall have the right to require the Company to redeem the bonds, in whole but not in part, at the Early Redemption Amount.
- d. Terms of Conversion
- i. Underlying Securities: ADS of the Company
 - ii. Conversion Period: The bonds are convertible at any time on or after July 4, 2011 and prior to May 14, 2016, into the Company's ADS; provided, however, that if the exercise date falls within 8 business days from the beginning of, and during, any closed period, the right of the converting holder of the bonds to vote with respect to the ADS it receives will be subject to certain restrictions.
 - iii. Conversion Price and adjustment: The conversion price was originally USD 3.77 per ADS, determined on the basis of a Fixed Exchange Rate of NTD 28.846=USD 1.00. The conversion price will be subject to adjustments upon the occurrence of certain events set out in the indenture. The conversion price was USD 3.2482 per ADS on December 31, 2013.
- e. Redemption on the Maturity Date: On the maturity date, the Company will redeem the bonds at 98.76% of the principal amount unless, prior to such date:
- i. The Company shall have redeemed the bonds at the option of the Company, or the bonds shall have been redeemed at option of the bondholder;
 - ii. The bondholders shall have exercised the conversion right before maturity; or
 - iii. The bonds shall have been redeemed or repurchased by the Company and cancelled.

In accordance with IAS 32, the value of the conversion right of the convertible bonds was determined at issuance and recognized in additional paid-in capital – stock options amounting to NT\$680 million, after reduction of issuance costs amounting to NT\$3 million. The effective interest rate on the liability component of the convertible bonds was determined to be 0.82%.

D. In early June 2012, the Company issued five-year and seven-year domestic unsecured corporate bonds amounting to NT\$10,000 million, with a face value of NT\$1 million per unit. The five-year domestic unsecured corporate bond was issued in the amount of NT\$7,500 million. Interest will be paid annually at a rate of 1.43% and the principal will be repayable in June 2017 upon maturity. The seven-year domestic unsecured corporate bond was issued in the amount of NT\$2,500 million. Interest will be paid annually at a rate of 1.63% and the principal will be repayable in June 2019 upon maturity.

E. In mid-March 2013, the Company issued five-year and seven-year domestic unsecured corporate bonds amounting to NT\$10,000 million, with a face value of NT\$1 million per unit. The five-year domestic unsecured corporate bond was issued in the amount of NT\$7,500 million. Interest will be paid annually at a rate of 1.35% and the principal will be repayable in March 2018 upon maturity. The seven-year domestic unsecured corporate bond was issued in the amount of NT\$2,500 million. Interest will be paid annually at a rate of 1.50% and the principal will be repayable in March 2020 upon maturity.

F. Repayments of the above-mentioned bonds in the future years are as follows:

Bonds repayable (Year)	Amount
2014	\$3,709,339
2015	-
2016	10,255,791
2017	7,500,000
2018 and thereafter	12,500,000
Total	\$33,965,130

(13) LONG TERM LOANS

- a. Details of long-term loans as of December 31, 2013 and December 31, 2012 are as follows:

Lenders	As of		Redemption

2017	902,030	433,333	-
2018 and thereafter	92,307	-	-
Total	<u>\$6,661,538</u>	<u>\$8,488,141</u>	<u>\$3,679,167</u>

- d. Please refer to Note 8 for property, plant and equipment pledged as collateral for long-term loans.

(14) POST-EMPLOYMENT BENEFITS

a. Defined contribution plan

The Labor Pension Act of the R.O.C. (the Act) which became effective on July 1, 2005 is a defined contribution plan. Employees can elect to continue to apply the relevant pension rules under the Labor Standards Law of the R.O.C., or to apply the pension rules under the Act and maintain the seniority achieved under the Labor Standards Law. Under the Act, the monthly contributions percentage shall not be less than 6% of these employees' monthly wages. The Company have been making monthly contributions of 6% based on each individual employee's salary or wage to employees' pension accounts beginning July 1, 2005. Based on the Act, a total of NT\$507 million and NT\$469 million were contributed by the Company for the years ended December 31, 2013 and 2012, respectively. Pension benefits for employees of the Singapore branch were provided in accordance with the local regulations, and during the years ended December 31, 2013 and 2012, the Company made total contributions of NT\$199 million and NT\$185 million, respectively.

b. Defined benefit plan

The employee pension plan mandated by the Labor Standard Act of the R.O.C. is a defined benefit plan. The pension benefits are disbursed based on the units of service years and the average salary in the last month of the service year. Two units per year are awarded for the first 15 years of services while one unit per year is awarded after the completion of the 15th year. The total units shall not exceed 45 units. Under the Labor Standards Act, the Company contributes an amount equivalent to 2% of the employees' total salaries and wages on a monthly basis to the pension fund deposited with the Bank of Taiwan under the name of an administered pension fund committee. The Company recognized pension expenses of NT\$107 million and NT\$108 million for the years ended December 31, 2013 and 2012, respectively.

c. Accumulated amounts of actuarial gain or loss recognized under other comprehensive income:

	For the years ended December 31,	
	2013	2012
Beginning balance of accumulated actuarial loss	\$481,273	\$-
Actuarial loss (gain) in current year	(456,608)	481,273
Ending balance of accumulated actuarial loss	<u>\$24,665</u>	<u>\$481,273</u>

d. Changes in defined benefit obligation during the year:

	For the years ended December 31,	
	2013	2012
Defined benefit obligation at beginning of year	\$(5,760,199)	\$(5,176,541)
Service cost	(43,295)	(42,348)
Interest cost	(86,403)	(90,589)
Actuarial gain (loss)	460,370	(468,681)
Benefits paid	<u>28,477</u>	<u>17,960</u>
Defined benefit obligation at end of year	<u><u>\$(5,401,050)</u></u>	<u><u>\$(5,760,199)</u></u>

Changes in fair value of plan assets during the year:

	For the years ended December 31,	
	2013	2012
Beginning balance of fair value of plan assets	\$1,521,949	\$1,436,133
Expected return on plan assets	22,829	25,132
Contribution by employer	91,839	91,236
Payment of benefit obligation	(28,477)	(17,960)
Actuarial loss	(3,762)	(12,592)
Ending balance of fair value of plan assets	<u>\$1,604,378</u>	<u>\$1,521,949</u>

The actual returns on plan assets of the Company for the years ended December 31, 2013 and 2012 were NT\$19 million and NT\$13 million.

e. Reconciliations of asset (liability) of the defined benefit plan are as follow:

	As of		
	December 31, 2013	December 31, 2012	January 1, 2012
Present value of the defined benefit obligation	\$(5,401,050)	\$(5,760,199)	\$(5,176,541)
Fair value of plan assets	<u>1,604,378</u>	<u>1,521,949</u>	<u>1,436,133</u>
Funded status	<u>(3,796,672)</u>	<u>(4,238,250)</u>	<u>(3,740,408)</u>
Accrued pension liabilities recognized on the parent company only balance sheets	<u>\$(3,796,672)</u>	<u>\$(4,238,250)</u>	<u>\$(3,740,408)</u>

f. The major categories of plan assets as a percentage of the fair value of the total plan assets are as follows:

	As of December 31, 2013
Cash	27%
Equity instruments	45%
Debt instruments	27%
Others	1%

	As of December 31, 2012
Cash	35%
Equity instruments	37%
Debt instruments	27%
Others	1%

	As of January 1, 2012
Cash	31%
Equity instruments	41%
Debt instruments	28%
Others	-

Employee pension fund is deposited under a trust administered by the Bank of Taiwan. The overall expected rate of return on assets is determined based on historical trend and analysts' expectations on the assets' returns in the market over the obligation period. Furthermore, the utilization of the fund by the labor pension fund supervisory committee and the fact that the minimum earnings are guaranteed to be no less than the earnings attainable from the amounts accrued from two-year time deposits with the interest rates offered by local banks are also taken into consideration in determining the expected rate of return on assets.

g. The historical information of experience adjustments are as follows:

	For the years ended December 31,	
	2013	2012
The present value of the defined benefit obligation	\$(5,401,050)	\$(5,760,199)
Fair value of plan assets	1,604,378	1,521,949
Funded status	<u>\$(3,796,672)</u>	<u>\$(4,238,250)</u>
Experience adjustments on plan liabilities	<u>\$(5,378)</u>	<u>\$(178,866)</u>
Experience adjustments on plan assets	<u>\$3,762</u>	<u>\$12,592</u>

The Company expects to contribute NT\$92 million to its defined benefit plan during the 12 months beginning from January 1, 2014.

The principal underlying actuarial assumptions are as follows:

	As of December 31, 2013
Discount rate	2.00%
Rate of salary increase	4.00%
Expected return on plan assets	2.00%

	<u>As of December 31, 2012</u>
Discount rate	1.50%
Rate of salary increase	4.00%
Expected return on plan assets	1.50%
	<u>As of January 1, 2012</u>
Discount rate	1.75%
Rate of salary increase	4.00%
Expected return on plan assets	1.75%

(15) EQUITY

a. Capital Stock:

- i. The Company had 26,000 million common shares authorized to be issued as of December 31, 2013, December 31, 2012 and January 1, 2012, of which 12,692 million shares, 12,952 million shares and 13,084 million shares were issued as of December 31, 2013, December 31, 2012 and January 1, 2012, respectively, each at a par value of NT\$10.
- ii. The Company had 168 million, 230 million and 230 million ADSs, which were traded on the NYSE as of December 31, 2013, December 31, 2012 and January 1, 2012, respectively. The total number of common shares of the Company represented by all issued ADSs were 842 million shares, 1,148 million shares and 1,148 million shares as of December 31, 2013, December 31, 2012 and January 1, 2012, respectively. One ADS represents five common shares.
- iii. On April 24, 2013, the Company cancelled 300 million shares of treasury stock, which were repurchased for the purpose of transferring to employees during the periods from February 4 to March 22, 2010.
- iv. On March 14, 2012, the Company cancelled 158 million shares of treasury stock, which were repurchased for the purpose of transferring to employees during the periods from January 7 to February 16, 2009.
- v. Among the employee stock options issued by the Company on June 19, 2009, 43 million options have been exercised as of December 31, 2013, of which the issuance of 40 million common shares has been approved by the authority, and the share registry has been updated as of December 31, 2013. The remaining 3 million shares were still pending for authorization as of December 31, 2013, thus, they were classified as Capital collected in advance.

- vi. Among the employee stock options issued by the Company on June 19, 2009, 26 million options were exercised during the year ended December 31, 2012. The issuance process was completed through the authority as of December 31, 2012.

b. Treasury stock:

- i. The Company carried out treasury stock programs, and repurchased its shares from the centralized securities exchange market. The purpose for repurchase, and changes in treasury stock during the years ended December 31, 2013 and 2012 are as follows:

For the year ended December 31, 2013

(In thousands of shares)

Purpose	As of January 1, 2013	Increase	Decrease	As of December 31, 2013
For transfer to employees	300,000	200,000	300,000	200,000

For the year ended December 31, 2012

(In thousands of shares)

Purpose	As of January 1, 2012	Increase	Decrease	As of December 31, 2012
For transfer to employees	457,934	-	157,934	300,000

- ii. According to the Securities and Exchange Law of the R.O.C., the total shares of treasury stock shall not exceed 10% of the Company's issued stock, and the total purchase amount shall not exceed the sum of the retained earnings, additional paid-in capital-premiums and realized additional paid-in capital. As such, the maximum number of shares of treasury stock that the Company could hold as of December 31, 2013 and 2012 were 1,269 million and 1,295 million shares, with the maximum payments of NT\$76,812 million and NT\$70,545 million, respectively.
- iii. In compliance with Securities and Exchange Law of the R.O.C., treasury stock should not be pledged, nor should it be entitled to voting rights or receiving dividends. Stock held by subsidiaries is treated as treasury stock. These subsidiaries have the same rights as other stockholders except for subscription to new stock issuance and voting rights.

- iv. As of December 31, 2013, the Company's subsidiary, FORTUNE VENTURE CAPITAL CORP., held 16 million shares of the Company's stock, with a book value of NT\$12.35 per share. The closing price on December 31, 2013 was NT\$12.35.
- v. As of December 31, 2012, the Company's subsidiary, FORTUNE VENTURE CAPITAL CORP., held 16 million shares of the Company's stock, with a book value of NT\$11.70 per share. The closing price on December 31, 2012 was NT\$11.70.
- vi. As of January 1, 2012, the Company's subsidiary, FORTUNE VENTURE CAPITAL CORP., held 16 million shares of the Company's stock, with a book value of NT\$12.70 per share. The closing price on January 1, 2012 was NT\$12.70.
- vii. The Company's subsidiary, FORTUNE VENTURE CAPITAL CORP., held shares of the Company's stock through acquiring shares of UNITED SILICON INC. in 1997, and these shares were converted to the Company's stock in 2000 as a result of the Company's 5 in 1 merger.

c. Retained earnings and dividend policies:

According to the Company's Articles of Incorporation, current year's earnings, if any, shall be distributed in the following order:

- i. Payment of all taxes and dues;
- ii. Offset prior years' operation losses;
- iii. Appropriate 10% of the remaining amount after deducting items (i) and (ii) as a legal reserve;
- iv. Appropriate or reverse special reserve in accordance with relevant laws or regulations, and
- v. Appropriate 0.1% of the remaining amount after deducting items (i), (ii), (iii) and (iv) as directors' remuneration; and
- vi. After deducting items (i), (ii), (iii) and (iv) above from the current year's earnings, no less than 5% of the remaining amount together with the prior years' unappropriated earnings is to be allocated as employee bonus, which will be settled through issuance of new shares of the Company, or cash. Employees of the Company's subsidiaries, meeting certain requirements determined by the Board of Directors, are also eligible for the employee stock bonus.
- vii. The distribution of the remaining portion, if any, will be recommended by the Board of Directors and resolved in the stockholders' meeting.

The policy for dividend distribution should reflect factors such as the current and future investment environment, funding requirements, domestic and international competition and capital budgets; as well as the benefit of stockholders, stock dividend equilibrium, and long-term financial planning. The Board of Directors shall make the distribution proposal annually and present it at the stockholders' meeting. The Company's Articles of Incorporation further provide that no more than 80% of the dividends to stockholders, if any, may be paid in the form of stock dividends. Accordingly, at least 20% of the dividends must be paid in the form of cash.

According to the regulations of Taiwan FSC, the Company is required to appropriate a special reserve in the amount equal to the sum of debit elements under equity, such as unrealized loss on financial instruments and negative cumulative translation adjustment, at every year-end. Such special reserve is prohibited from distribution. However, if any of the debit elements is reversed, the special reserve in the amount equal to the reversal may be released for earnings distribution or offsetting accumulated deficit.

The Company estimated the amounts of the employee bonuses and remunerations to director for the years ended December 31, 2013 and 2012. The Board of Directors estimated the amount by taking into consideration the Company's Articles of Incorporation, government regulations and industry averages. The estimated employee bonus and remunerations to directors are recognized in the profit or loss during the period when earned. If the board subsequently modifies the estimates significantly, the Company will recognize the change as an adjustment in the profit or loss in the same period. The difference between the estimation and the resolution of the stockholders' meeting will be recognized in profit or loss in the subsequent year. Upon stockholders' approval, the number of shares distributed as share dividends is calculated based on the total approved bonus amount divided by the closing price one day prior to the approved date with the consideration of the impacts of ex-right/ex-dividend. Information on the above mentioned employees bonuses and remuneration to directors and supervisors can be obtained from the "Market Observation Post System" on the website of the TSE.

The appropriation and compensation of 2013 unappropriated retained earnings have not yet been approved by the stockholder's meeting as of the reporting date. Information on the Board of Directors' recommendations and stockholders' approval can be obtained from the "Market Observation Post System" on the website of the TSE.

The distributions of cash dividend, employee bonus and directors' remuneration for 2013 and 2012 were approved through the Board of Directors' meeting and the stockholders' meeting held on March 12, 2014 and June 11, 2013, respectively. The details of distribution are as follows:

	2013	2012
Cash Dividend	NT\$0.50 per share	NT\$0.40 per share
Employee bonus – Cash (in thousand NT\$)	1,162,656	1,040,179
Directors’ remuneration (in thousand NT\$)	11,746	6,950

The aforementioned 2012 employees bonuses and remuneration to directors approved during stockholders’ meeting, were consistent with the resolutions of meeting of Board of Directors held on March 13, 2013.

The aforementioned cash dividend for 2012 was adjusted to NT\$0.40639654 per share due to the decrease in outstanding common stock as a result of newly issued shares to settle employee stock options exercised and the outstanding shares that the Company bought back from the market. The distribution was approved through the Board of Directors’ meeting held on June 19, 2013.

(16) EMPLOYEE STOCK OPTIONS

On December 22, 2005, October 9, 2007 and May 12, 2009, the Company was authorized by the Securities and Futures Bureau of the Financial Supervisory Commission, Executive Yuan, to issue employee stock options with a total number of 350 million, 500 million and 500 million units, respectively. Each unit entitled an optionee to subscribe to 1 share of the Company’s common stock. Settlement upon the exercise of the options would be made through the issuance of new shares by the Company. The exercise prices of the options were set at the closing prices of the Company’s common stock on the dates of grant. The contractual lives were 6 years and an optionee might exercise the options in accordance with certain schedules as prescribed by the plans after 2 years from the dates of grant. Detailed information relevant to the employee stock options is disclosed as follows:

Date of grant	Total number of options granted (in thousands)	Total number of options outstanding as of December 31, 2013 (in thousands)	Shares available to option holders as of December 31, 2013 (in thousands) (Note)	Exercise price (NT\$) (Note)
January 4, 2006	39,290	-	-	\$23.17
May 22, 2006	42,058	-	-	\$25.19
August 24, 2006	28,140	-	-	\$24.09
December 13, 2007	500,000	-	-	\$18.03
June 19, 2009	300,000	87,768	87,768	\$10.40
Total	909,488	87,768	87,768	

Note: The employee stock options granted prior to August 7, 2007, the effective date of capital reduction, were adjusted in accordance with the capital reduction rate. Each option unit entitled an optionee to subscribe approximately 0.7 share of the Company's common stock. The exercise prices of the options were also adjusted according to capital reduction rate. The number of shares that each stock option granted after August 7, 2007 remains to be 1.

- a. A summary of the Company's stock option plan and related information for the years ended December 31, 2013 and 2012 is as follows:

	For the years ended December 31,					
	2013			2012		
			Weighted-			Weighted-
	Options	Shares available to option holders	average exercise price per share (NTD)	Options	Shares available to option holders	average exercise price per share (NTD)
	(in thousands)	(in thousands)	(NTD)	(in thousands)	(in thousands)	(NTD)
Outstanding at beginning of period	465,006	465,006	\$15.86	560,526	547,724	\$16.09
Exercised	(42,540)	(42,540)	\$10.40	(25,588)	(25,588)	\$10.40
Forfeited	(12,000)	(12,000)	\$16.73	(38,969)	(35,544)	\$18.23
Expired	(322,698)	(322,698)	\$18.03	(30,963)	(21,586)	\$24.37
Outstanding at end of period	<u>87,768</u>	<u>87,768</u>	\$10.40	<u>465,006</u>	<u>465,006</u>	\$15.86
Exercisable at end of period	<u>82,839</u>	<u>82,839</u>	\$10.40	<u>395,142</u>	<u>395,142</u>	\$16.71

- b. The information on the Company's outstanding stock options as of December 31, 2013 is as follows:

Outstanding Stock Options						Exercisable Stock Options		
				Weighted-	Weighted-			Weighted-
		Shares	average	average	average			average
		available to	expected	exercise	exercise			exercise
Range of				price per				price per
Authorization	Exercise Price	Options	option holders	remaining	share	Options	option holders	share
Date	(NTD)	(in thousands)	(in thousands)	years	(NTD)	(in thousands)	(in thousands)	(NTD)
2009.05.12	\$10.40	87,768	87,768	1.46	\$10.40	82,839	82,839	\$10.40

The weighted-average share price at the date of exercise of employee stock options for the years ended December 31, 2013 and 2012 were NT\$13.46 and NT\$13.44, respectively.

- c. The options granted between January 1, 2004 and December 31, 2007 have all been vested before the transition date to TIFRS (January 1, 2012), and there has not been any modification to the stock option plans. Effective 2008, the compensation expenses related to the Company's compensatory employee stock option plan were calculated based on fair value. The compensation expenses for the years ended December 31, 2013 and 2012 were NT\$28 million and NT\$77 million, respectively.

The fair values of the options outstanding as of December 31, 2013 and 2012 were estimated at the dates of grant using the Black-Scholes options pricing model with the following weighted-average assumptions. The factors for the adoption of IFRS 2 "Share-based Payment" to account for share-based payments were as follows:

Items	Factors
Expected dividend yields	1.98%
Volatility factors of the expected market price of the Company's common stock	40.63%
Risk-free interest rate	1.01%
Weighted-average expected life	3.16~5.03 years

The aforementioned expected volatility reflects that the assumption that the historical volatility over a period similar to the life of the option is indicative of future trends. The expected option life is based on the historical data of periods for previously granted options. The expected dividend yield is based historical dividend yield. The risk-free interest rate is based on average interest rate for Taiwan Government Bond over a period similar to the life of the option. The estimates used to calculate the fair value of employee stock option cannot predict future events that are likely to occur or the final amounts employees will benefit from these options. In addition, future events will not affect the reasonableness of the initial calculation for fair value for the stock options. The compensation expenses for the stock options will be adjusted annually for the changes in expected forfeiture rates, with the effects recognized in the current period.

(17) OPERATING COSTS AND EXPENSES

The Company's personnel, depreciation, and amortization expenses are summarized as follows:

	For the years ended December 31,					
	2013			2012		
	Operating costs	Operating expenses	Total	Operating costs	Operating expenses	Total
Personnel expenses						
Salaries	\$11,255,220	\$3,796,782	\$15,052,002	\$10,674,092	\$3,494,263	\$14,168,355
Labor and health insurance	660,845	209,390	870,235	614,470	173,498	787,968
Pension	621,235	200,703	821,938	587,889	174,056	761,945

(21) INCOME TAX

- a. The major components of income tax expense for the years ended December 31, 2013 and 2012, are as follows:

- i. Income tax recorded in profit or loss

	For the years ended December 31,	
	2013	2012
Current income tax expense:		
Current income tax charge	\$276,147	\$770,244
Adjustments in respect of current income tax of prior periods	55,871	-
Deferred income tax expense (benefit):		
Deferred income tax expense related to origination and reversal of temporary differences	1,105,358	849,585
Deferred income tax related to recognition and derecognition of tax losses and unused tax credits	1,402,632	1,844,276
Adjustment of prior year's deferred income tax	(232,743)	-
Deferred tax expense arising from write-down or reversal of write-down of deferred tax asset	(584,983)	(1,407,009)
Income tax expenses recorded in profit or loss	<u>\$2,022,282</u>	<u>\$2,057,096</u>

- ii. Income tax relating to components of other comprehensive income (loss)

	For the years ended December 31,	
	2013	2012
Unrealized loss (gain) on available-for-sale financial assets	\$12,611	\$(3,132)
Share of changes in other comprehensive income of subsidiaries, associates and joint ventures accounted for using equity method	305,166	(292,845)
Actuarial gain (loss) on defined benefit plans	<u>(77,623)</u>	<u>81,736</u>
Income tax relating to components of other comprehensive income (loss)	<u>\$240,154</u>	<u>\$(214,241)</u>

iii. Deferred income tax charged directly to equity

	For the years ended December 31,	
	2013	2012
Temporary difference arising from the initial recognition of the equity component separately from the liability component	\$16,406	\$1,155
Adjustment of net assets of investee accounted for using equity method	776	-
Income tax relating to equity	<u>\$17,182</u>	<u>\$1,155</u>

- b. A reconciliation between tax expense and the product of accounting profit at applicable tax rate is as follows:

	For the years ended December 31,	
	2013	2012
Accounting profit before tax from continuing operations	<u>\$14,652,485</u>	<u>\$8,234,223</u>
At statutory income tax rate of 17%	2,490,923	1,399,818
Adjustments in respect of current income tax of prior periods	55,871	-
Net change in loss carry-forward and investment tax credit	779,479	184,550
Tax effect of deferred tax assets/liabilities	(232,743)	365,104
Tax effect of non-deductible (income) expenses:		
Tax exempt income	-	(55,066)
Investment gain-domestic	(1,206,595)	(162,615)
Dividend income	(107,915)	(143,827)
Other non-deductible expenses	177,871	378,165
Others	<u>65,391</u>	<u>90,967</u>
Total income tax expenses recorded in profit or loss	<u>\$2,022,282</u>	<u>\$2,057,096</u>

c. Significant components of deferred income tax assets and liabilities are as follows:

	As of December 31, 2013		As of December 31, 2012	
	Amount	Tax effect	Amount	Tax effect

Expiration Year	Accumulated loss	Unutilized accumulated loss
2021	<u>\$7,161,691</u>	<u>\$7,161,691</u>

As of December 31, 2012

Expiration Year	Accumulated loss	Unutilized accumulated loss
2021	<u>\$7,161,691</u>	<u>\$7,161,691</u>

As of January 1, 2012

Expiration Year	Accumulated loss	Unutilized accumulated loss
2021	<u>\$7,161,691</u>	<u>\$7,161,691</u>

- i. As of December 31, 2013, December 31, 2012 and January 1, 2012, deferred tax assets that have not been recognized as they may not be used to offset taxable profits amounted to NT\$2,769 million, NT\$3,736 million and NT\$5,145 million, respectively.

- j. Imputation credit information

	As of		
	December 31, 2013	December 31, 2012	January 1, 2012
Balances of imputation credit amounts	<u>\$1,107,537</u>	<u>\$706,674</u>	<u>\$917,442</u>

The expected creditable ratio for 2013 and the actual creditable ratio for 2012 were 4.07% and 7.21%, respectively.

- k. The Company's earnings generated in the year ended December 31, 1997 and prior years have been fully appropriated.
- l. As of December 31, 2013, December 31, 2012 and January 1, 2012, the taxable temporary differences of unrecognized deferred tax liabilities associated with investment in subsidiaries, amounted to NT\$7,928 million, NT\$2,363 million and NT\$7,793 million, respectively.

(22) EARNINGS PER SHARE

a. Earnings per share-basic

Basic earnings per share amounts are calculated by dividing the net profit for the year attributable to ordinary equity holders of the parent entity by the weighted average number of ordinary shares outstanding during the year.

	For the years ended	
	December 31,	
	2013	2012
Net income	\$12,630,203	\$6,177,127
Weighted-average number of ordinary shares for basic earnings per share (thousand shares)	12,507,512	12,624,817
Earnings per share-basic (NTD)	\$1.01	\$0.49

b. Earnings per share-diluted

Diluted earnings per share amounts are calculated by dividing the net profit attributable to ordinary equity holders of the parent (after adjusting for interest on the convertible bonds payable) by the weighted average number of ordinary shares outstanding during the period plus the weighted average number of ordinary shares that would be issued on conversion of all the dilutive potential ordinary shares into ordinary shares.

	For the years ended December 31,	
	2013	2012
Net income	\$12,630,203	\$6,177,127
Effect of dilution		
Unsecured convertible bonds	79,686	81,339
Income attributable to the Company's stockholders	<u>\$12,709,889</u>	<u>\$6,258,466</u>
Weighted average number of common stocks for basic earnings per share	12,507,512	12,624,817
Effect of dilution		
Employee bonus	128,787	151,031
Employee stock options	15,949	22,170
Unsecured convertible bonds	<u>659,219</u>	<u>652,022</u>
Weighted average number of common stocks after dilution	<u>13,311,467</u>	<u>13,450,040</u>
Diluted earnings per share (NTD)	<u>\$0.95</u>	<u>\$0.47</u>

As of December 31, 2013 and 2012, there were respectively nil and 332,656 thousand issued and outstanding stock options, which were not included in the computation of diluted earnings per share due to their antidilutive effect.

7. RELATED PARTY TRANSACTIONS

(1) Significant related party transactions

a. Operating transactions

Operating income

	For the years ended December 31,	
	2013	2012
UMC-USA	\$52,581,667	\$49,403,054
Other related parties (Note A)	<u>4,554,502</u>	<u>1,399,987</u>
Total	<u>\$57,136,169</u>	<u>\$50,803,041</u>

Note A: For the years ended December 31, 2013, transactions with other related parties are primarily consisted of transactions with UMC GROUP JAPAN. The amounts for the years ended December 31, 2013 was NT\$3,886 million. For the years ended December 31, 2012, transactions with other related parties are primarily consisted of transactions with UMC JAPAN. The amounts for the years ended December 31, 2012 was NT\$1,060 million.

Accounts receivable, net

	As of		
	December 31, 2013	December 31, 2012	January 1, 2012
UMC-USA	\$5,599,526	\$4,645,653	\$4,125,053
Other related parties (Note B)	878,242	280,745	191,937
Total	6,477,768	4,926,398	4,316,990
Less : Allowance for sales returns and discounts	(253,854)	(456,761)	(75,631)
Less : Allowance for doubtful accounts	(14,638)	(14,901)	(258,515)
Net	<u>\$6,209,276</u>	<u>\$4,454,736</u>	<u>\$3,982,844</u>

Note B: As of December 31, 2013, balances of other related parties are accounts receivables primarily from UMC GROUP JAPAN. As of December 31, 2013, the balance was NT\$846 million. As of December 31, 2012 and January 1, 2012, balances of other related parties are accounts receivables primarily from UMC JAPAN. As of December 31, 2012 and January 1, 2012, the balances were NT\$180 million and NT\$173 million, respectively.

The sales price to the above related parties was determined through mutual agreement based on the market rates. The collection periods for domestic sales to related parties were month-end 45~60 days, while the term for overseas sales was net 60 days.

b. Significant asset transactions

		For the year ended December 31, 2013		
	Item	Purchase price	Disposal amount	Disposal gain
EVERRICH	Purchase of property, plant and equipment	\$12,738	\$-	\$-
UMC JAPAN	Purchase of property, plant and equipment	25,784	-	-

c. Key management personnel compensation

For the years ended December 31,		
	2013	2012
Short-term employee benefits	\$183,017	\$147,877
Post-employment pension	1,859	1,069
Termination benefits	-	-
Share-based payment transactions	1,757	5,018
Others	-	-
Total	<u>\$186,633</u>	<u>\$153,964</u>

8. ASSETS PLEDGED AS COLLATERAL

As of December 31, 2013 and December 31, 2012

	Amount		Party to which asset(s) was pledged	Purpose of pledge
	December 31, 2013	December 31, 2012		
Deposits-out (Time deposit)	\$809,079	\$809,040	Customs	Customs duty guarantee
Deposits-out (Time deposit)	156,658	122,728	Science Park Administration	Collateral for land lease
Deposits-out (Time deposit)	52,800	52,800	Liquefied Natural Gas Business Division, CPC Corporation, Taiwan	Energy resources guarantee
Deposits-out (Time deposit)	1,246	1,246	Bureau of Energy, Ministry of Economic Affairs	Energy resources guarantee
Deposits-out (Time deposit)	1,110	-	Hsinchu Kuang-Fu high school	Cooperative education
Machinery and equipment	-	348,633	Bank of Taiwan	Collateral for long-term loans
Total	<u>\$1,020,893</u>	<u>\$1,334,447</u>		

As of January 1, 2012

	Amount		
	As of		
	January 1,	Party to which asset(s)	Purpose of
	2012	was pledged	pledge
Deposits-out (Time deposit)	\$609,857	Customs	Customs duty guarantee
Deposits-out (Time deposit)	122,728	Science Park Administration	Collateral for land lease
Deposits-out (Time deposit)	43,800	Liquefied Natural Gas Business Division, CPC Corporation, Taiwan	Energy resources guarantee
Deposits-out (Time deposit)	1,246	Bureau of Energy, Ministry of Economic Affairs	Energy resources guarantee
Machinery and equipment	1,125,094	Bank of Taiwan	Collateral for long-term loans
Total	<u>\$1,902,725</u>		

9. SIGNIFICANT CONTINGENCIES AND UNRECOGNIZED CONTRACT COMMITMENTS

- (1) The Company entered into several patent license agreements and development contracts of intellectual property for a total contract amount of approximately NT\$12.6 billion. Royalties and development fees payable in future years are NT\$4.6 billion as of December 31, 2013.
- (2) The Company entered into several construction contracts for the expansion of its factory premises. As of December 31, 2013, these construction contracts amounted to approximately NT\$6 billion and the unpaid portion of the contracts, which would be accrued, was approximately NT\$2.1 billion.
- (3) The Company entered into several operating lease contracts for land and offices. These renewable operating leases will expire in various years through 2033. Future minimum lease payments under those leases are as follows:

	As of		
Year	December 31, 2013	December 31, 2012	January 1, 2012
2012	\$-	\$-	\$234,144
2013	-	302,630	234,610
2014	270,673	259,842	200,752
2015	262,178	249,080	192,219
2016	233,843	230,681	164,616
2017	223,419	222,320	154,998
2018 and thereafter	2,002,900	1,987,003	1,120,049
Total	<u>\$2,993,013</u>	<u>\$3,251,556</u>	<u>\$2,301,388</u>

10. SIGNIFICANT DISASTER LOSS

None.

11. SIGNIFICANT SUBSEQUENT EVENTS

In order to integrate resources and expand operation for improving operating performance and industrial competitiveness, the merger with WIESON TECHNOLOGIES CO., LTD. (WIESON) was resolved by the ALLIANCE OPTOTEK CORP.'s (ALLIANCE) Board of Directors meeting held on January 23, 2014 and WIESON will be the surviving company. The stock exchange ratio is one share of WIESON's common stock will be given to exchange 3.75 shares of ALLIANCE's common stock and the provisional merger date is June 3, 2014. The follow up procedures will be determined after this merger is approved by the ALLIANCE's shareholders' meeting and the authority in charge.

(2) Financial risk management objectives and policies

The Company's risk management objectives are to manage market risk, credit risk and liquidity risk related to its operating activities. The Company identifies measures and manages the aforementioned risks based on policy and risk preference.

The Company has established appropriate policies, procedures and internal controls for financial risk management. Before entering into significant financial activities, due approval process by the Board of Directors and Audit Committee must be carried out based on related protocols and internal control procedures. The Company complies with its financial risk management policies at all times.

(3) Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risks comprise of currency risk, interest rate risk, and other price risk (such as equity price risk).

Foreign currency risk

The Company's exposure to the risk of changes in foreign exchange rates relates primarily to the Company's operating activities (when revenue or expense is denominated in a different currency from the Company's functional currency) and the Company's net investments in foreign subsidiaries.

The Company has foreign currency risk arising from purchases or sales and applies natural hedges. Furthermore, as net investments in foreign subsidiaries are for strategic purposes, they are not hedged by the Company.

The foreign currency sensitivity analysis of the possible change in foreign exchange rates on the Company's profit is performed on significant monetary items denominated in foreign currencies as of the end of the reporting period. When NTD strengthens/ weakens against USD by 10%, the profit for the years ended December 31, 2013 and 2012 increases/decreases by NT\$172 million and NT\$185 million, respectively.

Interest rate risk

The Company's exposure to market risk for changes in interest rates relates primarily to the Company's bank loans with floating interest rates, therefore the change in market interest rates will create fluctuation in future cash flows. At the reporting date, a change of 10 basis points of interest rate in a reporting period could cause the profit for the years ended December 31, 2013 and 2012 to decrease/increase by NT\$9 million and NT\$11 million, respectively.

Equity price risk

The Company's listed and unlisted equity securities are susceptible to market price risk arising from uncertainties about future performance of equities markets. The Company's listed equity investments are classified as financial assets at fair value through profit or loss and available-for-sale financial assets, while unlisted equity securities are classified as available-for-sale financial assets which are subsequently measured using a valuation model and financial assets measured at cost.

The sensitivity analysis for the equity instruments is based on the change in fair value as of the reporting date. A change of 5% in the price of the aforementioned financial assets at fair value through profit or loss could increase/decrease the Company's profit for the years ended December 31, 2013 and 2012 by NT\$12 million and NT\$13 million, respectively. A change of 5% in the price of the aforementioned available-for-sale financial instruments could increase/decrease the Company's other comprehensive income for the years ended December 31, 2013 and 2012 by NT\$773 million and NT\$895 million.

(4) Credit risk management

The Company only trades with approved and creditworthy third parties. Where the Company trades with third parties which have less favorable financial positions, it will request collateral from them. It is the Company's policy that all customers who wish to trade on credit terms are subject to credit verification procedures. In addition, note and accounts receivable balances are monitored on an ongoing basis, which consequently minimizes the Company's exposure to bad debts.

The Company mitigate the credit risks from financial institutions by limiting its counter parties to only reputable domestic or international financial institutions with good credit standing and spreading its holdings among various financial institutions. The Company's exposure to credit risk arising from the default of counter-parties is limited to the carrying amount of these instruments.

As of December 31, 2013, December 31, 2012 and January 1, 2012, accounts receivables from the top ten customers represent 78%, 80% and 86% of the total accounts receivables of the Company, respectively. The credit concentration risk of other accounts receivables is insignificant.

(5) Liquidity risk

The Company's objectives are to maintain a balance between continuity of funding and flexibility through the use of cash and cash equivalents, bank loans and bonds.

The table below summarizes the maturity profile of the Company's financial liabilities based on the contractual undiscounted payments and contractual maturity:

	As of December 31, 2013				
	Less than 1 year	2 to 3 years	4 to 5 years	> 5 years	Total
Short-term loans	\$2,410,658	\$-	\$-	\$-	\$2,410,658
Payables	20,899,525	-	-	-	20,899,525
Capacity deposits	8,967	81,896	-	-	90,863
Bonds payable	14,445,976	573,500	15,325,037	5,062,867	35,407,380

Total	<u>\$39,090,156</u>	<u>\$5,245,518</u>	<u>\$16,347,515</u>	<u>\$5,062,867</u>	<u>\$65,746,056</u>

As of December 31, 2012					
	Less than 1 year	2 to 3 years	4 to 5 years	> 5 years	Total
Short-term loans	\$2,350,478	\$-	\$-	\$-	\$2,350,478
Payables	18,677,794	-	-	-	18,677,794
Capacity deposits	-	34,896	-	-	34,896
Bonds payable	4,883,189	296,000	20,013,687	2,558,408	27,751,284
Long-term loans	1,654,349	2,754,414	4,549,608	-	8,958,371
Total	<u>\$27,565,810</u>	<u>\$3,085,310</u>	<u>\$24,563,295</u>	<u>\$2,558,408</u>	<u>\$57,772,823</u>

As of January 1, 2012					
	Less than 1 year	2 to 3 years	4 to 5 years	> 5 years	Total
Short-term loans	\$4,586,737	\$-	\$-	\$-	\$4,586,737
Payables	19,677,800	-	-	-	19,677,800
Capacity deposits	3,031	-	-	-	3,031
Bonds payable	6,125,110	-	12,420,903	-	18,546,013
Long-term loans	517,100	1,010,682	2,379,000	-	3,906,782
Total	<u>\$30,909,778</u>	<u>\$1,010,682</u>	<u>\$14,799,903</u>	<u>\$-</u>	<u>\$46,720,363</u>

(6) Fair value of financial instruments

a. Fair value of financial instruments carried at amortized cost

Other than those listed in the table below, the carrying amounts of the Company's financial assets (including held-to-maturity investments, loans and receivables) and liabilities measured at amortized cost approximate their fair value:

	As of			
	December 31, 2013		December 31, 2012	
Financial Liabilities	Book Value	Fair Value	Book Value	Fair Value
Bonds payable	\$33,606,417	\$33,414,971	\$26,224,353	\$25,583,972
Long-term loans	6,661,538	6,661,538	8,488,141	8,488,141

	As of	
	January 1, 2012	
Financial Liabilities	Book Value	Fair Value
Bonds payable	\$17,404,788	\$15,458,061
Long-term loans	3,679,167	3,679,167

- b. The methods and assumptions applied in determining the fair value of financial instruments:

The fair value of the financial assets and liabilities represents the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. The following methods and assumptions were used to estimate the fair values:

- i. The book values of short-term financial instruments approximate their fair value due to their short maturities. Short-term financial instruments include cash and cash equivalents, receivables, deposits-out, other financial assets-current, short-term loans, payables and capacity deposits due within one year.
- ii. Fair values of financial assets at fair value through profit or loss and available-for-sale financial assets are based on the quoted market prices in active market. If there is no active market, the Company estimates the fair value by using the market method valuation techniques based on parameters such as recent fund raising activities, valuation of similar companies, individual company's development, market conditions and other economic indicators. If there are restrictions on the sale or transfer of an available-for-sale financial asset, which are a characteristic of the asset, the fair value of the asset will be determined based on similar but unrestricted financial assets' quoted market price with appropriate discounts for the restrictions.
- iii. The fair value of held-to-maturity financial assets is based on the quoted market price in active markets. If there is no active market, the Company estimates the fair value based on book value.
- iv. The fair value of bonds is determined by the market price, discounted cash flow analysis, or option pricing model.
- v. The fair value of long-term loans is determined using discounted cash flow analysis, based on the Company's current incremental borrowing rates for borrowings with similar types.

- c. Assets measured at fair value

The following table contains financial instruments measured at fair value and the details of the three levels of the fair value hierarchy:

Level 1: quoted (unadjusted) prices in active markets for identical assets or liabilities.

Level 2: other techniques for which all inputs that have a significant effect on the recorded fair value are observable, either directly or indirectly.

Level 3: techniques that use inputs that have a significant effect on the recorded fair value that are not based on observable market data.

As of December 31, 2013				
	Level 1	Level 2	Level 3	Total
Financial assets:				
Financial assets at fair value through profit or loss, current	\$633,264	\$-	\$-	\$633,264
Available-for-sale financial assets, current	2,134,379	-	-	2,134,379
Available-for-sale financial assets, noncurrent	11,297,565	-	2,082,787	13,380,352
Financial liabilities:				
Financial liabilities at fair value through profit or loss, current	-	1,928	-	1,928

As of December 31, 2012				
	Level 1	Level 2	Level 3	Total
Financial assets:				
Financial assets at fair value through profit or loss, current	\$655,994	\$-	\$-	\$655,994
Available-for-sale financial assets, current	4,330,880	-	-	4,330,880
Available-for-sale financial assets, noncurrent	12,467,278	-	1,197,014	13,664,292
Financial liabilities:				
Financial liabilities at fair value through profit or loss, current	-	767,605	-	767,605

As of January 1, 2012				
	Level 1	Level 2	Level 3	Total
Financial assets:				
Financial assets at fair value through profit or loss, current	\$695,931	\$-	\$-	\$695,931
Available-for-sale financial assets, current	5,124,780	-	-	5,124,780
Available-for-sale financial assets, noncurrent	14,148,908	-	1,048,432	15,197,340
Financial liabilities:				
Financial liabilities at fair value through profit or loss, current	-	741,531	-	741,531

During the years ended December 31, 2013 and 2012, there were no significant transfers between Level 1 and Level 2 fair value measurements.

Reconciliations for fair value measurement in Level 3 fair value hierarchy were as follow:

	Available-for-sale financial assets			
	Common stock	Funds	Preferred stock	Total
As of January 1, 2013	\$986,436	\$45,278	\$165,300	\$1,197,014
Recognized in profit (loss)	(100,146)	(8,004)	-	(108,150)
Recognized in other comprehensive income (loss)	109,109	1,932	147,300	258,341

(8) Capital management

The primary objective of the Company's capital management is to ensure that it maintains a strong credit rating and healthy capital ratios to support its business and maximize the stockholders' value.

The objective of Company's capital management is to ensure the ability to operate continuously to provide returns to stockholders and the interests of other related parties, while maintaining the optimal capital structure to reduce costs of capital.

To maintain or adjust the capital structure, the Company may adjust the dividend payment to stockholders, return capital to stockholders, issue new shares or dispose assets to redeem liabilities.

Similar to its peers, the Company monitors its capital based on debt to capital ratio. The ratio is calculated as the Company's net debt divided by its total capital. The net debt is derived by taking the total liabilities on the balance sheet minus cash and cash equivalents. The total capital consists of all parts of equity (equity, additional paid-in capital, retained earnings, other equity and non-controlling interests) plus net debt.

The Company has maintained the same capital management strategy as of December 31, 2013 as compared to the year ended December 31, 2012, which is to maintain a reasonable ratio in order to raise capital within reasonable cost. The debt to capital ratios as of December 31, 2013, December 31, 2012 and January 1, 2012, were as follows:

	As of December 31,	
	2013	2012
Total liabilities	\$71,044,000	\$64,220,557
Less: Cash and cash equivalents	(36,014,085)	(31,723,084)
Net debt	35,029,915	32,497,473
Total equity	208,121,188	201,959,901
Total capital	\$243,151,103	\$234,457,374
Debt to capital ratios	14.41%	13.86%

	As of January 1,	
	2012	
Total liabilities	\$51,260,210	
Less: Cash and cash equivalents	(30,821,409)	
Net debt	20,438,801	
Total equity	208,171,665	
Total capital	\$228,610,466	
Debt to capital ratios	8.94%	

13. ADDITIONAL DISCLOSURES

- (1) The following are additional disclosures for the Company and its affiliates as required by the R.O.C. Securities and Futures Bureau:
 - a. Financing provided to others for the year ended December 31, 2013: Please refer to Attachment 1.
 - b. Endorsement/Guarantee provided to others for the year ended December 31, 2013: Please refer to Attachment 2.

- c. Securities held as of December 31, 2013 (excluding subsidiaries, associates and joint venture): Please refer to Attachment 3.
- d. Individual securities acquired or disposed of with accumulated amount exceeding the lower of NT\$300 million or 20 percent of the capital stock for the year ended December 31, 2013: Please refer to Attachment 4.
- e. Acquisition of individual real estate with amount exceeding the lower of NT\$300 million or 20 percent of the capital stock for the year ended December 31, 2013: Please refer to Attachment 5.
- f. Disposal of individual real estate with amount exceeding the lower of NT\$300 million or 20 percent of the capital stock for the year ended December 31, 2013: Please refer to Attachment 6.
- g. Related party transactions for purchases and sales amounts exceeding the lower of NT\$100 million or 20 percent of the capital stock for the year ended December 31, 2013: Please refer to Attachment 7.
- h. Receivables from related parties with amounts exceeding the lower of NT\$100 million or 20 percent of capital stock as of December 31, 2013: Please refer to Attachment 8.
- i. Names, locations and related information of investees as of December 31, 2013 (excluding investment in Mainland China): Please refer to Attachment 9.
- j. Financial instruments and derivative transactions: Please refer to Note 12.

(2) Investment in Mainland China

- a. Investee company name, main businesses and products, total amount of capital, method of investment, accumulated inflow and outflow of investments from Taiwan, net income (loss) of investee company, percentage of ownership, investment income (loss), book value of investments, cumulated inward remittance of earnings and limits on investment in Mainland China: Please refer to Attachment 10.
- b. Directly or indirectly significant transactions through third regions with the investees in Mainland China, including price, payment terms, unrealized gain or loss, and other events with significant effects on the operating results and financial condition: None.

14. OPERATING SEGMENT INFORMATION

In accordance with Article 22 of the Regulations, the Company is not required to prepare operating segment information for the parent company only financial statements. Please refer to the consolidated financial statements of United Microelectronics Corporation and subsidiaries for operating segment information.

15. FIRST TIME ADOPTION OF INTERNATIONAL FINANCIAL REPORTING STANDARDS

(1) Basis of preparation of TIFRSs

For all periods up to and including the year ended December 31, 2012, the Company prepared its financial statements in accordance with generally accepted accounting principles in R.O.C. (R.O.C. GAAP). The year ended December 31, 2013 is the first reporting period the Company prepared parent company only financial statements in accordance with TIFRSs.

Accordingly, the Company prepared financial statements which comply with TIFRSs and the Regulations beginning from January 1, 2013 as described in Note 4. Furthermore the first interim financial statements prepared under TIFRSs also comply with the requirements under TIFRS 1 “First-time Adoption of International Financial Reporting Standards”. The Company’s opening balance sheet was prepared as of January 1, 2012, the Company’s date of transition to TIFRSs.

(2) Exemptions applied in accordance with TIFRS 1

TIFRS 1 allows first-time adopters certain exemptions from the retrospective application of certain TIFRSs. The Company applied the following exemptions:

- a. TIFRS 3 “Business Combinations” has not been applied to acquisitions of subsidiaries or of interests in associates and joint ventures that occurred before January 1, 2012. By applying this exemption, immediately after the business combination, the carrying amount in accordance with R.O.C. GAAP of assets acquired and liabilities assumed in that business combination, shall be their deemed cost in accordance with TIFRSs at that date. The subsequent measurement of these assets and liabilities will be in accordance with TIFRSs. Under TIFRS 1, the carrying amount of goodwill in the opening TIFRSs balance sheet shall be its carrying amount in accordance with R.O.C. GAAP at December 31, 2011, after testing for impairment and any reclassification to intangible assets that are required to be recognized. The Company performed goodwill impairment testing as at the date of transition to TIFRSs and no impairment loss was recognized as at that date.
- b. The Company recognized all cumulative actuarial gains and losses on pensions as at the date of transition to TIFRSs directly in retained earnings.

(3) Impacts of transitioning to TIFRSs

The following tables contain reconciliation of parent company only balance sheets as of January 1, 2012 (the date of transition to TIFRSs) and December 31, 2012 and statements of comprehensive income for the year ended December 31, 2012:

a. Reconciliation of parent company only balance sheet items as of January 1, 2012

- d. Material adjustments to the parent company only statement of cash flows for the year ended December 31, 2012

The transition from R.O.C. GAAP to TIFRSs has not had a material impact on the statement of cash flows. The parent company only statement of cash flow prepared under R.O.C. GAAP was reported using the indirect method. Furthermore, cash flows from interest and dividends received and interest paid were classified as cash flows from operating activities and interest and dividends received were not disclosed separately. However, in accordance with the requirements under IAS 7 “Statement of Cash Flows”, the interest received for the year ended December 31, 2012, is disclosed in the statement of cash flows in the amount of NT\$151 million. The interest payments for the year ended December 31, 2012, is disclosed in the statement of cash flows in the amount of NT\$120 million. The dividends received for the year ended December 31, 2012, is disclosed in the statement of cash flow in the amount of NT\$903 million. Interest and dividends received and interest paid are classified as cash flows from operating activities.

Apart from the aforementioned differences, there were no material differences between the parent company only statements of cash flows prepared under R.O.C. GAAP and TIFRSs.

(4) Impact of transitioning to TIFRSs

- a. Material adjustments to the parent company only balance sheet as of January 1, 2012 (the date of transition to TIFRSs)
 - i. Under TIFRSs, the Company reclassified financial assets measured at cost, noncurrent to available-for-sale financial assets measured at fair value, noncurrent. In addition, when the Company discontinues the use of the equity method because it ceases to have significant influence over the subsidiary and an associate, the Company measures at fair value any investment it retains in the former associate as well as eliminates all additional paid-in capital and equity adjustment items related to the former associate in current profit or loss under TIFRSs, or in retained earnings at the date of transition of TIFRSs. These changes caused available-for-sale financial assets, noncurrent to increase by NT\$1,868 million, financial assets measured at cost, noncurrent to decrease by NT\$1,783 million, retained earnings to decrease by NT\$55 million, unrealized gain or loss on available-for-sale financial assets to increase by NT\$154 million and cumulative translation adjustment to decrease by NT\$13 million.

- ii. Under TIFRSs, the acquisition of a non-controlling interest is not within the scope of business combination, and therefore, it is not in the scope of exemptions for business combination in TIFRS 1 “First-time Adoption of International Financial Reporting Standards”. As a result, a retroactive adjustment is required to adjust the differences for acquisitions of non-controlling interests prior to the transition date. This change in accounting principles would cause investments accounted for under the equity method to increase by NT\$1,785 million, retained earnings to increase by NT\$1,694 million and other adjusting items in equity to increase by NT\$90 million.
- iii. Under R.O.C. GAAP, the Company’s property that is leased to another entity was recorded as leased property under other assets. Under TIFRSs, the Company reclassified these assets from other assets to property, plant and equipment as they do not meet the definition of investment property. In addition, prepayment for equipment is reclassified from property, plant and equipment to other non-current assets as they do not meet the definition of property, plant and equipment. These changes in accounting principles would cause property, plant and equipment, net to decrease by NT\$6,495 million and other non-current assets to increase by NT\$6,495 million.
- iv. Software, patent licenses and intellectual property are reclassified to intangible assets as they meet the definition of intangible assets. This change would cause intangible assets to increase by NT\$1,339 million and other non-current assets to decrease by NT\$1,339 million.
- v. The Company selects the exemption for employee benefits under the TIFRS 1 “First-time Adoption of International Financial Reporting Standards” and recognizes all cumulative actuarial gains and losses in retained earnings. The exemption selection for employee benefits would cause the accrued pension liabilities to increase by NT\$393 million and retained earnings to decrease by NT\$393 million.
- vi. Under the requirements of IAS 1 “Presentation of Financial Statements”, deferred tax assets and liabilities are classified as non-current. Therefore, deferred tax assets and liabilities, current, are reclassified as non-current. Under the requirements of IAS 12 “Income Tax”, an entity shall offset deferred tax assets and liabilities if, and only if, the entity has a legally enforceable right to set off current tax assets against current tax liabilities; and if the deferred tax assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities which intend, in each future period in which significant amounts of deferred tax are expected to be settled or recovered, to settle their current tax assets and liabilities either on a net basis or simultaneously. Further, if the tax base of the liability component of the compound financial instrument on initial recognition is equal to the initial carrying amount of the sum of the liability and equity components, the resulting taxable temporary differences should be recognized as a deferred tax liability. The deferred tax is charged directly to the carrying amount of the equity component and subsequent changes in the deferred tax liability are recognized in profit or loss as deferred tax expense (benefit). Due to differences discussed above, current assets decreased by NT\$262 million, other non-current assets increased by NT\$616 million, other non-current liabilities increased by NT\$375 million, additional paid-in capital decreased by NT\$101 million, retained earnings increased by NT\$77 million, unrealized gain or loss on available-for-sale financial assets increased by NT\$5 million and cumulative translation adjustment decreased by NT\$2 million.

- vii. Other adjustments would cause investments accounted for under the equity method to decrease by NT\$1,085 million, other non-current liabilities to decrease by NT\$64 million, retained earnings to decrease by NT\$747 million, additional paid-in capital to increase by NT\$0.1 million, unrealized gain or loss on available-for-sale financial assets to decrease by NT\$252 million and cumulative translation adjustment to decrease by NT\$22 million.
- b. Material adjustments to the parent company only balance sheet as of December 31, 2012
- i. Under TIFRSs, the Company reclassified financial assets measured at cost, noncurrent to available-for-sale financial assets measured at fair value, noncurrent. In addition, when the Company discontinues the use of the equity method because it ceases to have significant influence over the subsidiary and an associate, the Company measures at fair value any investment it retains in the former associate as well as eliminates all additional paid-in capital and equity adjustment items related to the former associate in current profit or loss under TIFRSs, or in retained earnings at the date of transition of TIFRSs. This changes in accounting principles caused non-current available-for-sale financial assets to increase by NT\$2,092 million, non-current financial assets measured at cost to decrease by NT\$1,743 million, retained earnings to decrease by NT\$540 million, unrealized gain or loss on available-for-sale financial assets to increase by NT\$902 million and cumulative translation adjustment to decrease by NT\$13 million.
 - ii. Under TIFRSs, the acquisition of a non-controlling interest is not within the scope of business combination, and therefore, it is not in the scope of exemptions for business combination in IFRS 1 “First-time Adoption of International Financial Reporting Standards”. As a result, a retroactive adjustment is required to adjust the differences for acquisitions of non-controlling interests prior to the transition date. This change in accounting principles would cause investments accounted for under the equity method to increase by NT\$408 million, retained earnings to increase by NT\$443 million and other adjustment in equity to decrease by NT\$35 million.
 - iii. Under R.O.C. GAAP, the Company’s property that is leased to another entity was recorded as leased property under other non-current assets. Under TIFRSs, the Company reclassified these assets from other non-current assets to property, plant and equipment as they do not meet the definition of investment property. In addition, prepayment for equipment is reclassified from property, plant and equipment to other non-current assets as they do not meet the definition of property, plant and equipment. These changes in accounting principles would cause property, plant and equipment, net to increase by NT\$671 million and other non-current assets to decrease by NT\$671 million.

- iv. Software, patent licenses and intellectual property are reclassified to intangible assets as they meet the definition of intangible assets. This change would cause intangible assets to increase by NT\$1,414 million and other non-current assets to decrease by NT\$1,414 million.
- v. The Company selects the exemption for employee benefits under TIFRS 1 “First-time Adoption of International Financial Reporting Standards”, and recognizes all unrecognized actuarial gains and losses in retained earnings. The exemptions election for employee benefits would cause other non-current assets to increase by NT\$81 million, accrued pension liabilities to increase by NT\$872 million and retained earnings to decrease by NT\$791 million.
- vi. Under the requirements of IAS 1 “Presentation of Financial Statements”, deferred tax assets or liabilities are classified as non-current. Therefore, deferred tax assets or liabilities, current, are reclassified as non-current. Under the requirements of IAS 12 “Income Tax”, an entity shall offset deferred tax assets and liabilities if, and only if, the entity has a legally enforceable right to set off current tax assets against current tax liabilities; and if the deferred tax assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities which intend, in each future period in which significant amounts of deferred tax are expected to be settled or recovered, to settle their current tax assets and liabilities either on a net basis or simultaneously. Further, if the tax base of the liability component of the compound financial instrument on initial recognition is equal to the initial carrying amount of the sum of the liability and equity components, the resulting taxable temporary differences should be recognized as a deferred tax liability. The deferred tax is charged directly to the carrying amount of the equity component and subsequent changes in the deferred tax liability are recognized in profit or loss as deferred tax expense (benefit). Due to differences discussed above, current assets decreased by NT\$877 million, other non-current assets increased by NT\$2,430 million, other non-current liabilities increased by NT\$1,608 million, additional paid-in capital decreased by NT\$100 million, unrealized gain or loss on available-for-sale financial assets increased by NT\$4 million, retained earnings increased by NT\$90 million and cumulative translation adjustment decreased by NT\$49 million.

- vii. The Company decreased its equity interests in a foreign operation through capital reduction and return of capital, and the differences of the accumulated currency translation adjustments before and after the capital reduction is recognized in profit or loss under R.O.C. SFAS. Under IAS 21 “The Effects of Changes in Foreign Exchange Rates”, as the entity did not lose control over its foreign operations, the Company was not considered to have a partial disposal of its foreign operations. Accordingly, none of the accumulated currency translation adjustments associated with the foreign operations were reclassified to profit or loss. This difference resulted in a decrease in investments accounted for under the equity method by NT\$251 million, a decrease of retained earnings by NT\$233 million and a decrease in other adjusting items in equity by NT\$18 million
 - viii. Other adjustments would cause unrealized gain or loss on available-for-sale financial assets to decrease by NT\$23 million, investments accounted for under the equity method to decrease by NT\$180 million, other non-current liabilities to decrease by NT\$31 million, additional paid-in capital to increase by NT\$5 million, retained earnings to decrease by NT\$384 million and cumulative translation adjustment to increase by NT\$253 million.
- c. Material adjustments to the parent company only statement of comprehensive income for the year ended December 31, 2012
- i. Under TIFRSs, the acquisition of a non-controlling interest is not within the scope of business combination, and therefore, it is not in the scope of exemptions for business combination in TIFRS 1, “First-time Adoption of International Financial Reporting Standards”. As a result, a retroactive adjustment is required to adjust the differences for acquisitions of non-controlling interests prior to the transition date. This would cause non-operating income to decrease by NT\$1,251 million.
 - ii. The Company decreased its equity interests in a foreign operation through capital reduction and return of capital, and the differences of the accumulated currency translation adjustments before and after the capital reduction is recognized in profit or loss under R.O.C. SFAS. Under IAS 21 “The Effects of Changes in Foreign Exchange Rates”, as the entity did not lose control over its foreign operations, the company was not considered to have partially disposed of its foreign operations. Accordingly, none of the accumulated currency transaction adjustments associated with the foreign operations were reclassified to profit or loss. This difference resulted in the decrease in non-operating income by NT\$233 million.
 - iii. Other adjustments would cause cost of goods sold to decrease by NT\$1 million, operating expenses to decrease by NT\$1 million, other operating income to increase by NT\$55 million, non-operating income to decrease by NT\$228 million and income tax expense to decrease by NT\$13 million.

ATTACHMENT 1 (Financing provided to others for the year ended December 31, 2013)

0	UNITED MICROELECTRONICS CORPORATION	NEXPOWER TECHNOLOGY CORPORATION	3	\$10,406,059	\$1,400,000	\$1,400,000	\$1,385,000	\$-	0.67%	\$41,624,238

Note 1: The Company and its subsidiaries are coded as follows:

1. The Company is coded "0".
2. The subsidiaries are coded consecutively beginning from "1" in the order presented in the table above.

Note 2: According to the "Guidelines Governing the Preparation of Financial Reports by Securities Issuers" issued by the R.O.C. Securities and Futures Bureau, receiving parties should be disclosed as one of the following:

1. A company that has a business relationship with UMC.
2. A subsidiary in which UMC holds directly over 50% of equity interest.
3. An investee in which UMC and its subsidiaries hold over 50% of equity interest.
4. An investee in which UMC holds directly and indirectly over 50% of equity interest.
5. A company that has provided guarantees to UMC, and vice versa, due to contractual requirements.
6. An investee in which UMC conjunctly invests with other shareholders, and for which UMC has provided endorsement/guarantee in proportion to its shareholding percentage.

Note 3: The amount of guarantees/endorsements shall not exceed 20% of the net worth of UMC; and the ceilings on the amount of guarantees/endorsements for any single entity are as follows:

1. The amount of guarantees/endorsements for any single entity shall not exceed 5% of net worth of UMC.
2. The amount of guarantees/endorsements for a company which UMC does business with, except the ceiling rules abovementioned shall not exceed the needed amounts arising from business dealings which is the higher amount of total sales or purchase transactions between UMC and the receiving party.

The aggregate amount of guarantees/endorsements that the Company as a whole is permitted to make shall not exceed 40% of the Company's net worth, and the aggregate amount of guarantees/endorsements for any single entity shall not exceed 20% of the Company's net worth.

Note 4: Limit of total guarantee/endorsement amount shall not exceed 20% of UMC's net assets value as of December 31, 2013.

Note 5: On December 19, 2012, the board of directors resolved to provide endorsement to NEXPOWER's syndicated loan from banks including Bank of Taiwan for the amount up to NT\$ 1,400 million.

As of December 31, 2013, actual amount provided was NT\$1,385 million.

Note 1: The changes in shares in current period is due to the Company adjusted the exchange price of the unsecured foreign exchangeable bonds according to the indenture and therefore, some shares were reclassified from available-for-sale financial assets, noncurrent to available-for-sale financial assets, current.

Note 2: The decrease in shares in current period is due to some shares were reclassified from available-for-sale financial assets, current to available-for-sale financial assets, noncurrent as a result of the Company redeemed the unsecured foreign exchangeable bonds and the bondholders exercised their rights to exchange their bonds for the reference shares.

Note 3: The decrease was resulted from recognizing impairment loss.

Note 4: The decrease in shares held is because the investee returned the capital to its shareholders.

Note 5: The increase in shares held is due to the Company redeemed the unsecured foreign exchangeable bonds and therefore, some shares were reclassified from available-for-sale financial assets, current to available-for-sale financial assets, noncurrent.

Note 6: The increase in shares held is because the Company received the stock dividend from the investee.

Note 7: The increase in shares held is because the Company lost significant influence and therefore, these shares were reclassified from investments accounted for under the equity method to available-for-sale financial assets, noncurrent.
